GENERAL INFORMATION

Wilson® Mouse Out^{MC} Rat & Mouse Killer Pellets is a product for the control of mice and rats. Mice must feed exclusively on this product for a minimum of 3 days for death to occur, while rats must feed exclusively for a minimum of 8 days for death to occur.

DIRECTIONS FOR USE: For indoor use only (in buildings such as homes and barns). Remove all food sources prior to treatment. For the control of mice and rats, open place packs and insert pellets into bait stations, feeding trays or bowls. Keep remaining package contents tightly sealed to prevent bait from acquiring an undesirable odour. Place bait stations where there are signs of mouse or rat activity such as fresh droppings or near burrows, runs, feeding places and points of entry. Optimal application times are during periods of limited food supply and high activity. Mice and rats are sporadic feeders, so several bait stations are required. Place bait stations 1.2 m to 1.8 m apart. Inspect bait stations every 48 hours and replace any spoiled bait. Maintain an uninterrupted supply of fresh bait for at least 6-8 days for mice and at least 8 days for rats, or until signs of mouse or rat activity cease for a period of 2 or more days. If all bait has been eaten from certain areas, add additional bait stations. Protect bait stations from non-target animals. To prevent bait from spoiling, bait stations should be placed away from sources of moisture. Replace any wet or spoiled bait. Relocate bait stations to a dry location if necessary.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Keep away from children, pets, domestic animals and wildlife. It is advisable to wear protective gloves to dispose of any dead mice and rats or handle bait and/or bait stations that have been visited by mice and rats. Always wash hands after handling carcasses or bait and bait stations.

FIRST AID: Get medical attention immediately for any toxic reaction or irritation that persists or is severe. **If in eyes,** hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If on skin or clothing,** take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If swallowed,** call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **If inhaled,** move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Do not reuse empty container. Discard in household garbage. Container is recyclable where programs or facilities exist.

For additional product information or in case of emergency, spills or fire, call toll-free 1-800-268-2806.
