# FOR CORRECTIONS FACILITIES

## WHAT IS IT?

FLE is able to provide **refurbished Xbox One S systems** with games downloaded and ready to play. We're opting for the One S because it can play all modern games and has a disc drive to insert games after you own it.

We've opened up the systems and **removed Wi-Fi capability**, so the Xbox cannot reach an internet connection. The Xbox does not have Bluetooth.

Each system has up to 1TB of space - we'll set up an account and download the games you want directly on the Xbox. If you have enough space after downloads, disc games can be inserted, downloaded, and played as well.

## WHAT IS THE PROCESS?

Residents can **choose the games they want downloaded onto their Xbox**. We can create custom orders with a system and games for individuals, or we can make a package of games that will suit everyone.

We'll provide a **downloaded** copy of the games you request. We'll make sure they're updated to the latest version and that the system is running smoothly.

We'll **ship to you** for free. If you want more games after ordering your device, we can supply a list of games you can purchase and we can send to you. Keep in mind that there does need to be space for disc games to download onto the system to be played.

## HOW IS IT PRICED?

### Pricing includes:

- Refurbished Xbox One S and one wired controller
  - Wi-Fi disabled
  - Anti-tamper stickers and settings applied
- 6-month limited warranty against manufacturing defects
- Tech support available via phone call to troubleshoot devices
