Fence Details

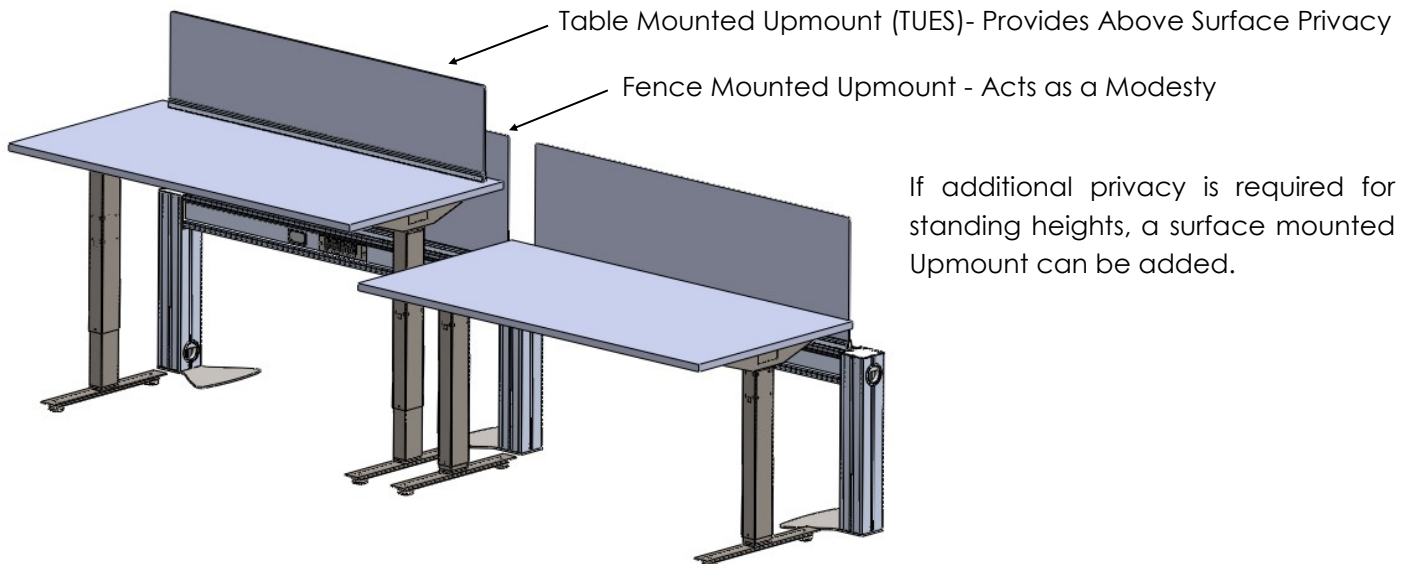

Dividers in a Linear Configuration

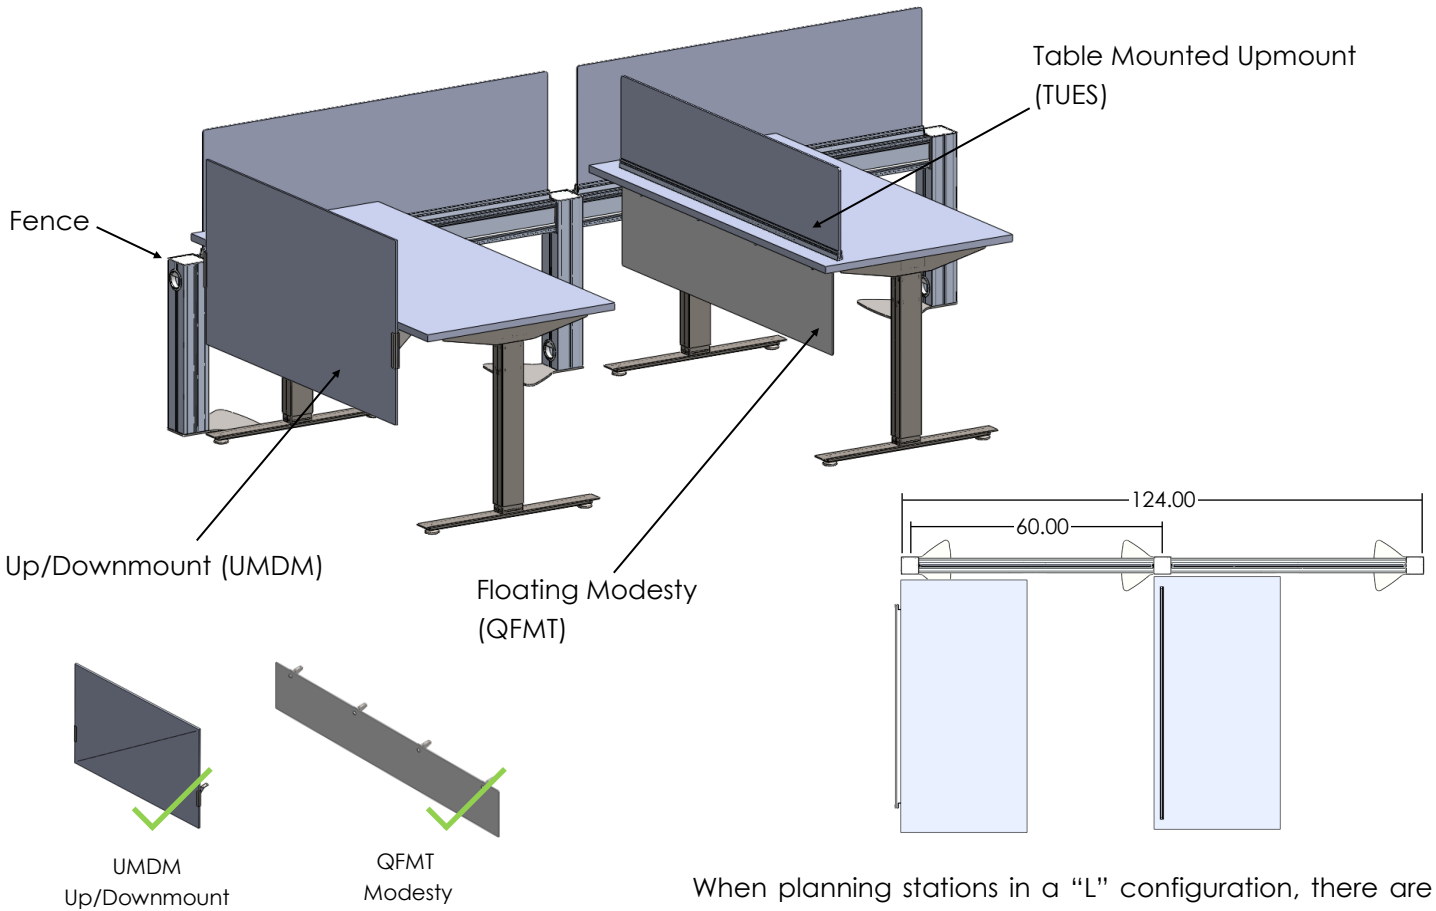

Dividers that hang below the surface should not be used in a linear application. This includes QFMT, TDEA and UMDM dividers. When the height adjustable table is in a low position, there is a risk of these dividers blocking the user's electrical access.

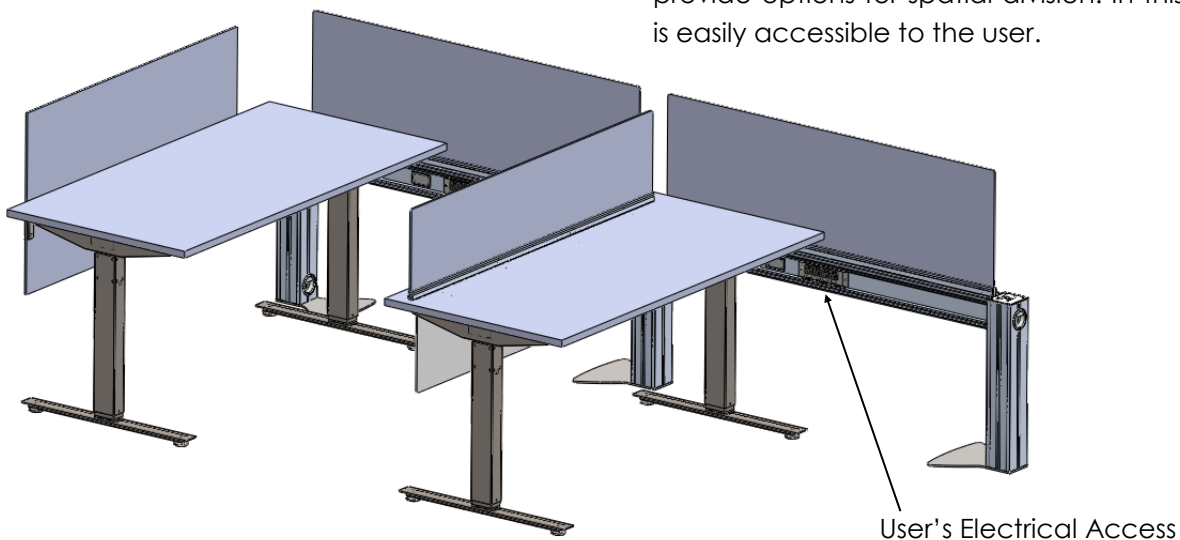

As shown, modesty division is provided by a Fence mounted Upmount. The combination of this Upmount, along with Fence itself, will provide 12" of modesty below a 29" high (seated height) surface.

Dividers in a "L" Configuration

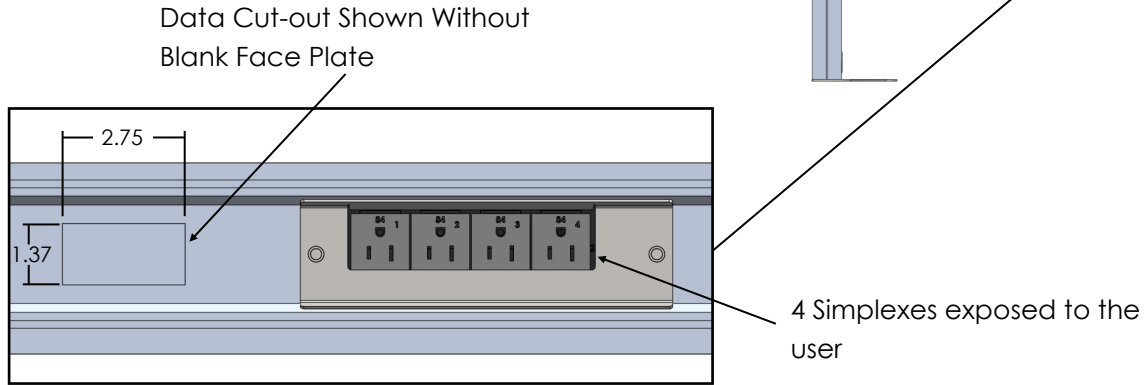

When planning stations in a "L" configuration, there are various solutions to provide modesty and above surface privacy. Shown above, the Up/Downmount as well as the combination of a table mounted Upmount and Modesty provide options for spatial division. In this case, electrical is easily accessible to the user.

Simplex and Data Cut-out Details

The Data Cut-out can support various off the shelf face plates such as Decora or other competitive IT products.

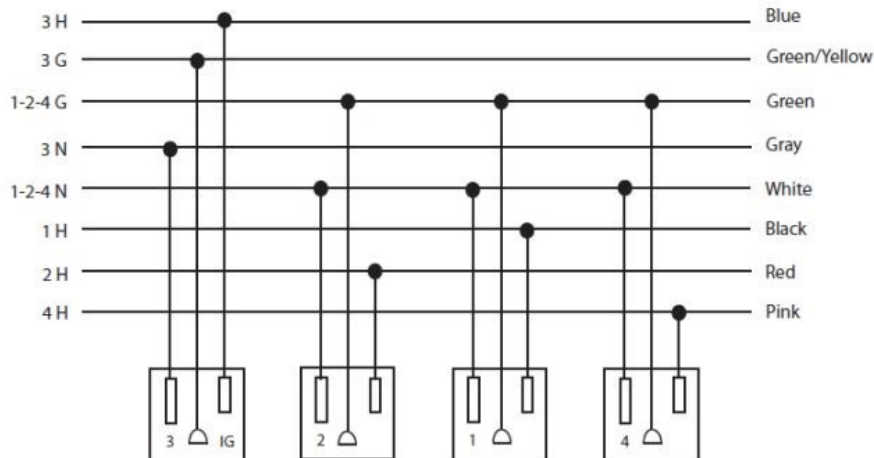

Base Feed Information and Wiring Diagram

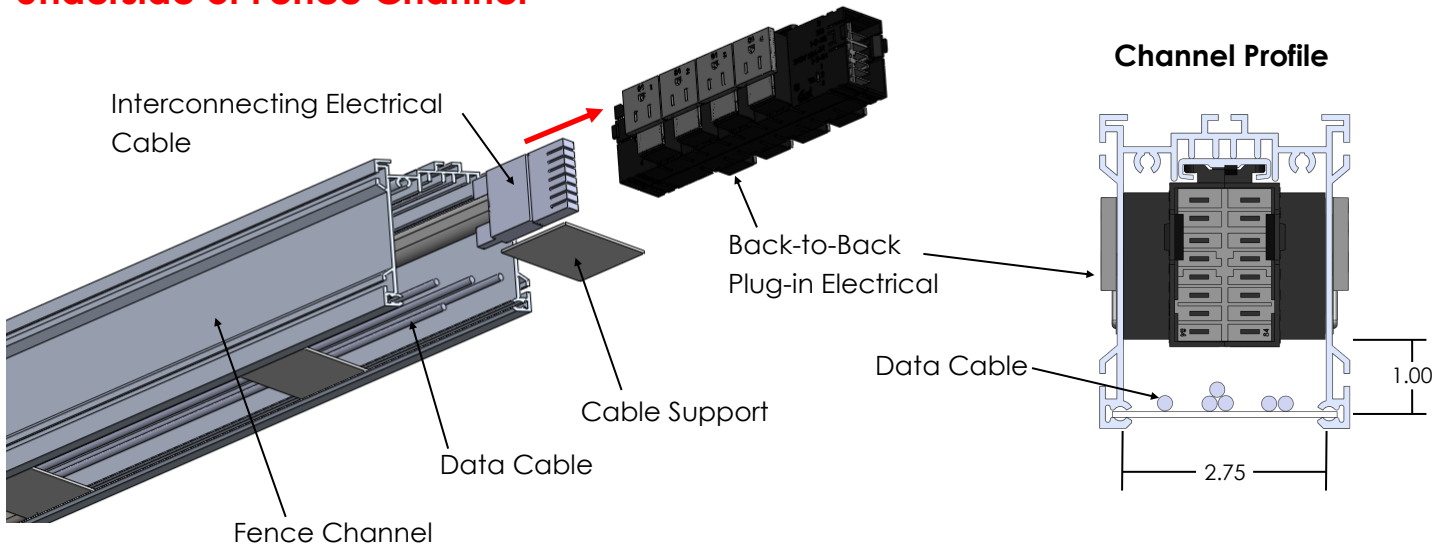

Number of Simplexes per Base Feed - An 8wire/4circuit Hardwire Base Feed will allow 20 simplexes (outlets) per circuit. Therefore, one Hardwire 8wire/4circuit Base Feed will provide power for up to twenty users, each with a single #1, #2, #3 and #4 simplex (outlet).

A Plug-in 3wire/1circuit Base Feed will follow the same logic. However, since a Plug-in Base Feed only distributes 1 circuit, the number of users is reduced. The Plug-in Base Feed will provide power for five users, each with four #1 simplexes (outlets)

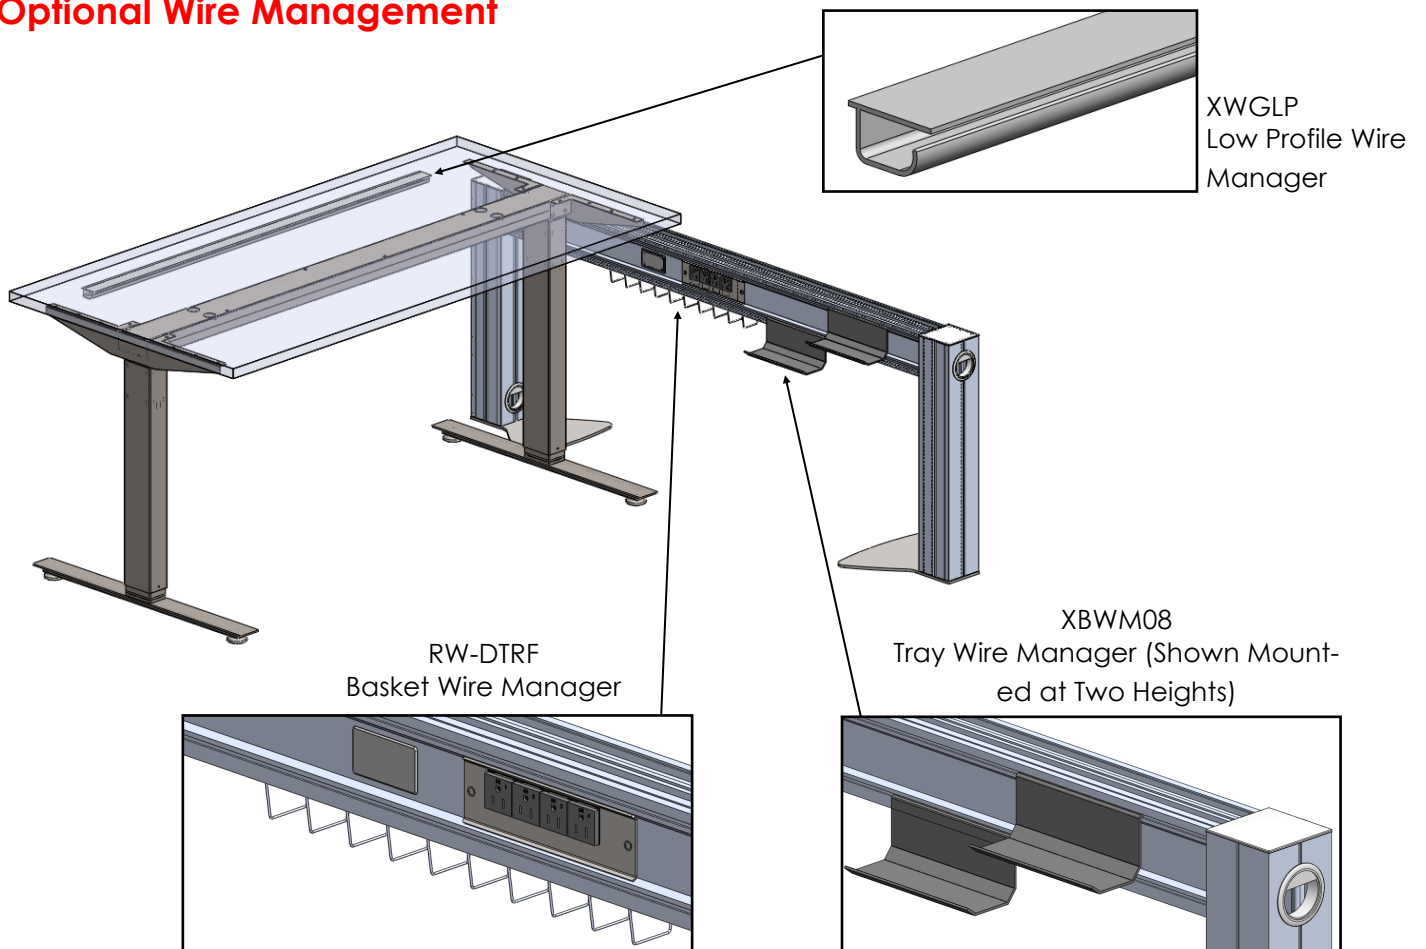

Wiring - The diagram shown below represents the proper wiring procedure for our 8 Wire/ 4 Circuit Hard-wired Base Feed. In this system, the third circuit is an Isolated Ground.

Fence with Storage Towers

In order to create linear runs of tables and towers, corresponding sizes of Fence, Fence Upmounts and Interconnecting Cables are offered. Sizes allow for a 60" or 72" table to be combined with one of two storage towers.

	Table Size	Storage Tower
77" Wide Components	60"	7 SBF
85" Wide Components	72"	7 SBF
89" Wide Components	60"	7SIS
97" Wide Components	72"	7SIS

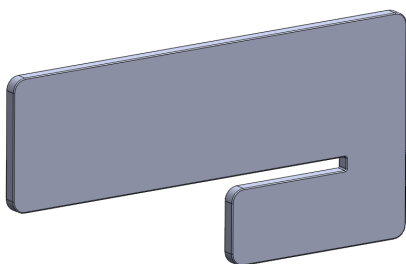

*** Components that allow for linear runs of tables and towers are highlighted on the individual pricing pages.

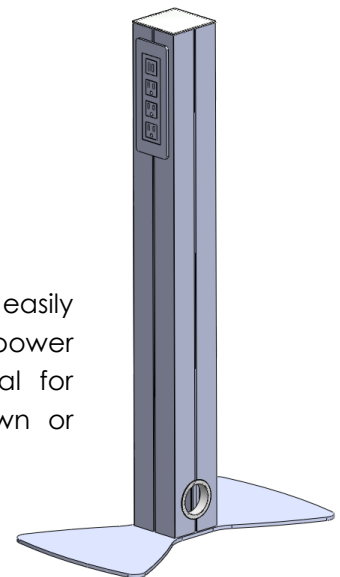

Additional Highlights

TASO is a movable, slide-on divider. Made from Softscape, this convenient spatial divider is both tackable, as well as offering acoustical properties.

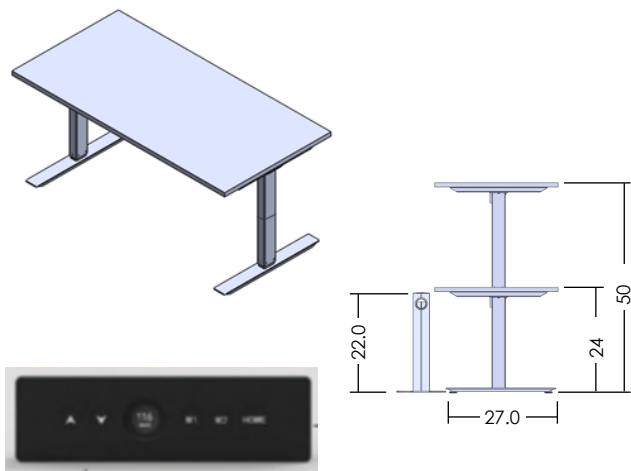

Hitch'n Post is a freestanding, easily moveable access point for power and USB Charging. It is ideal for moveable tables, touch down or casual areas.
