

Stained Glass Medallion

Die Set

LAYERING GUIDE

Gradient Cardstock Set:

■ Cherry Blossom

■ Sea Shore

Designer's Tips:

For the most accurate look of stained glass, die cut the thinnest layer from black cardstock. Adhere to a piece of vellum with liquid adhesive, then use alcohol markers to color each segment from behind. The light will shine through beautifully!

As an alternative, you can cut multiple times from a variety of cardstock and try an inlaid technique: fit each of the colored shapes into the outline like a puzzle.
