

## **Mini Delight:**

Mini Pattern Power Stamp Set

## LAYERING GUIDE

Rotate 120°, Ink

## Designer's Tips:

If you stamp and rotate 120 degrees to fit the elements within each other, the result will be a 3D pattern of cubes within cubes. To create a seamless pattern, fit the next set right against it like a puzzle. That being said, you can form other interesting designs by stamping in different orientations!

The hearts were designed to be small enough to fit within the smallest cube of the design. Stamp it in a darker color or heat emboss to make it stand out!

Inks: Obsidian Ruby Red Pink Pearl
