Dynamic Duo:
Luscious Flora Stamp Set

Designer's Tips:

If you only want to create one flower, you can stamp the detail layer onto your project first, then selectively ink through the stencils to add color to the flowers and leaves. You can also fussy cut around the image if you want to pop it up with a bit of foam tape!

To add more life to your flowers, try inking each one with more than one color! Use our Mini Blending Brushes or Detailed Blending Brushes to add one color at the base of each bloom, then blend it out to a different color towards the petal edges.

Inks:

- Obsidian
- Pink Pearl
- Heart Beat
- Firefly
- Shadow Creek
