Designer's Tips:

The pond is a perfect shape for creating shaker cards! Cut the solid pond piece two times, one out of acetate and another of blue cardstock. Then, cut the outline out of gold cardstock and adhere it over the acetate piece. Flip over the piece and add foam tape all around the border. Add sequins, remove the release paper, and close up with the second pond piece you cut out of cardstock. Finish up your project by adorning your scene with some flowers and leaves.
