

NATURAL SKIN DETOX

If you want a healthy skin with radiant complexion and an even tone of the skin, use Savarnas Mantra Natural Skin Detox. The Glycolic Acid will replenish your skin with moisture and minimize the appearance of fine lines, wrinkles, dullness, discoloration and other skin imperfections.

WHAT IS GLYCOLIC ACID?

Glycolic acid is derived from sugar cane. It belongs to the alpha-hydroxy acid (AHA) family. The main function of Glycolic Acid is to exfoliate the dead skin. Glycolic Acid gives the skin a newer and fresher look. It makes you feel rejuvenated and brings new skin to the surface.

Glycolic acid has a small molecular structure which helps it to penetrate deeper into the skin, acting as a booster for other treatments when used as a system.
