

NATURAL BLEMISH TREATMENT

Let's begin by talking about blemishes. Do you know what causes blemishes in the skin? Blemishes originate because of blocked pores. The blocked pores increase as a result of increased sebum, which is the natural oil that we produce. And how does sebum production increase? Sebum gets increased because of the presence of the male hormone, testosterone. High testosterone levels (yes even in women), or sensitivity to testosterone may cause an increased production of sebum.

When this extra oil blocks the pores of the skin, sebum along with dead skin cells build up and create blockages that result into blackheads or whiteheads.

These blocked pores are completely airtight and therefore serves as ideal home for bacterial growth. The bacterium further leads to inflammation under the skin resulting into red and painful blemishes.

SO HOW IS SAVARNAS MANTRA NATURAL BLEMISH

Savarnas Mantra Natural Blemish Treatment uses 4 active ingredients to reduce excess pore oil, unclog the blocked pores and tighten and constrict the pores to reduce swelling and irritation.

Salicylic Acid has oil soluble property. It can dilute and reduce the amount of oils that build up in pores, reducing the swelling and irritation caused from excessive oil clogging.

Glycolic Acid occurs naturally as a trace component in sugarcane, grapes and other fruits. It is one of the smallest molecules with acid functionality, which easily penetrates the skin. Glycolic Acid reacts with the upper layer of the epidermis and weakens the binding properties of the lipids that hold dead skin cells together and dislodges them to reveal fresh new cells that are underneath.

Menthol is an organic compound derived from mint oils and provides excellent soothing and counter-irritant properties to help soothe swelling and discomfort caused by pimples and infected skin pores.

Witch Hazel is one of nature's best astringent ingredients. Traditionally used by Native Americans for its skin healing and soothing properties, it helps constrict the skin pores and reduce pore dilation. Witch Hazel keeps the pores smaller and harder to fill with dirt and other pollutants. Further, it exhibits natural anti-oxidant properties. These properties help in protecting the skin from harmful free radicals and environmental damage that is caused to the skin.

OTHER INGREDIENTS

The other ingredients that are used in this product are: Isopropyl Alcohol, Zinc Sulfate, Camphor, Cellulose Gum and Menthol.

Natural Blemish Treatment has no product that would irritate your sensitive skin. We have carefully chosen ingredients that are unassociated with skin irritation and show maximum skin compatibility. So buy our product for a smooth, blemish-free, spotless skin and enjoy the benefits of natural ingredients.

Witch Hazel is a fine astringent, helping to tighten skin pores

Menthol derived from mint oils provides a cooling and soothing effect to help alleviate discomfort

Salicylic Acid and Glycolic Acid help unclog the skin pores of excess oil and removes pollutants
