

NATURAL PIGMENT CORRECTION SERUM

Skin discoloration caused by the sun and age related genetic mutations can result in unsightly dark spots and blotching. This can dramatically affect your appearance, making you look older and unhealthy.

SKIN PIGMENT- MELANIN

Melanin is the skin's natural dark pigment that is generated in response to environmental stresses and genetic sequence. It is the primary contributor towards dark spot discoloration. If we effectively target the skin's process of melanin production, we can gain a substantial amount of pigment correction.

Tyrosinase is an enzyme that is responsible for controlling the skin's production of melanin. Savarnas Mantra Natural Pigment Correction Serum uses a blend of plant extracts to specifically target the tyrosinase enzyme. By inhibiting the Tyrosinase enzyme, melanin formation is dramatically halted.

The rich blend of natural plant extracts that exhibit the tyrosinase inhibiting properties, consists of Mallow Extract, Peppermint Leaf Extract, Cowslip Extract, Alchemilla extract, Speedwell, Lemon Balm, Yarrow, Skullcap root Extract, White Mulberry Extract, Saxifrage Extract, and Grape Extract.

DO YOU KNOW WHAT MALLOW EXTRACT IS?

So this Mallow is commonly known as Marshmallow. Yes!! That yummy delicious thing you eat. But it also has certain properties for a healthy and glowing skin!!

The chemical structure of the Hydrogen Peroxide (H₂O₂) breaks down into water (H₂O) and oxygen (O). The water provides moisturization, while the oxygen works to enhance the breathing and metabolic process that influences the development of new skin cells.

This process helps stimulate the production of collagen, providing a more youthful and healthy appearance.

An oxygen rich environment helps deter bacteria, which is a useful means in treating problematic skin. Savarnas Mantra Natural Oxygen Mask also contains Hyaluronic acid. This ingredient occurs naturally within the skin, and has the propensity to attract and retain water from the outside environment, making it an excellent moisturizer.

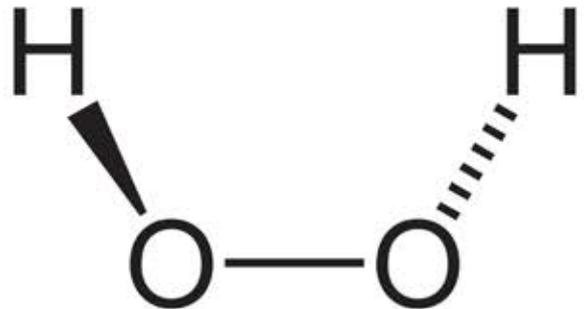

OTHER INGREDIENTS

At Savarnas Mantra we ensure that we have not added any harmful ingredient to our products. We even make sure that that no ingredient that causes skin irritation is added. Further, we do not have any added hormones or artificial fragrances in our product. Our products are paraben free and cruelty free. They have not been tested on animals. No animal has been harmed during the process of making the product. We use only natural botanical ingredients in our products that have the benefits of vitamins, minerals and proteins.

Other ingredients in Savarnas Mantra Natural Oxygen Mask are Glyceryl Polyacrylate, Hesperidin Methyl Chalcone, Perfluorodecalin, Steareth-20, Dipeptide-2, Palmitoyl Tetrapeptide-7, Phenoxyethanol, Ethylhexylglycerin and Blue 1 in our Natural Oxygen Mask.

Hydrogen peroxide is a natural cleanser that helps deliver skin nourishing oxygen

Hyaluronic Acid occurs naturally within the skin and is an excellent moisturizer
