

## NATURAL SKIN TONIC

Natural Skin Tonic instantly replenishes the undernourished cells to give you that freshness and rejuvenated look. Squalane will further leave that sparkling glow of beauty on your skin.

Savarnas Mantra Natural Skin Tonic is a powerful moisturizer and hydration stabilizer. It has been carefully created to replenish the skins natural lipid quantity, by restoring essential lipids which are lost to aging, washing, stress, or environmental exposure.

Fortify your delicate skin membranes and lock in moisture to regain a youthful and healthy appearance. Take advantage of this fabulous formula made with the state of the art technology and intelligently replenish the lipids.

## HOW ARE ESSENTIAL LIPIDS IMPORTANT?

Essential lipids are a naturally occurring family of compounds. They reinforce the delicate membranes, and regulate the moisture content of the skin. The outer most layer of your skin depends on a balanced quantity of lipids to hold the moisture within and to keep your skin healthy and youthful in appearance.

Owing to the various factors such as aging or environmental exposure, the skin loses its natural lipid count, leading to an upset in moisture balance, dried skin, wrinkles and an aged appearance. Although the body naturally replenishes its lipid content, the effectiveness and speed may be hindered by age, diet, stress, or genetics.

## HOW DOES SAVARNAS MANTRA NATURAL SKIN TONIC WORKS?

Savarnas Mantra Natural Skin Tonic uses a mixture of plant derived lipids. These lipids are extracted via biofermentation techniques to deliver instant replenishment to lacking or undernourished cells. This provides a natural and fast acting boost of moisture equilibrium, to compensate for the inadequate lipid count. We've mixed these essential lipids into a Squalane based emollient for the most direct and rapid delivery.

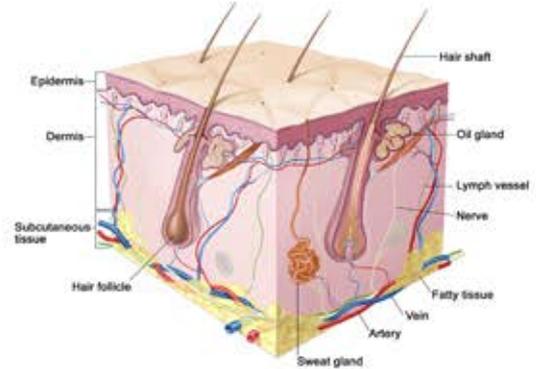

Once the cells are replenished, Savarnas Mantra Natural Skin Tonic restructures the outer layer of the skin to maintain moisture in a better manner. This rearrangement of skin leads to strengthened reinforcement for longer moisture balance, and protection against the elements.

## WHAT IS SQUALANE?

In reality, Squalane is a natural substance that is produced by our own bodies. It has been researched that at the time of birth, as much as 12% of the skin surface is made up of squalane.

However, with age, the production of squalane declines, thereby demanding topical application of this element.

Squalane is a natural olive extract. It gets absorbed and integrated seamlessly into the cells, thanks to its compatibility and affiliation with sebum, the natural oil of the skin.

The outer most layer of your skin (epidermis) depends on a balanced quantity of lipids

A mixture of plant derived lipids delivers much needed moisture balance to your skin

Based in a Squalane emollient, the lipids are deployed rapidly for instant results

As a naturally occurring substance, squalane provides the skin with superior hydration besides fighting off the skin damaging free radicals. This keeps away the signs of aging and helps balance the oil production. Good moisture content helps keep the skin clear, revitalised and healthy looking.

Besides, Squalane has powerful anti aging properties that help you age with grace and beauty!! It has anti inflammatory benefits that will help fight acne and eczema.

## **OTHER INGREDIENTS**

Besides the natural active ingredients, some other ingredients are: Cyclomethicone, Ethylhexyl Cocoate, Dimethiconol, Glycolipids, Ceramide 3 and Cholesterol.
