

## NATURAL ULTIMATE NOURISHING HYALURONIC MOISTURIZER

Lightweight yet ultra-hydrating, Savarnas Mantra Natural Ultimate Nourishing Hyaluronic Cream gets absorbed quickly. It infuses the skin with a multi-layered moisture system.

This cream is an emulsification of hyaluronic acid, squalane, jojoba seed oil, and apricot kernel oil. The specific formula has the unique ability to cater to skin's individual hydration needs. As a hydrophilic, or water-attracting molecule, hyaluronic acid ensures that the skin receives perfect amount of hydration. When applied, this formula immediately sinks in, improving the appearance of fine lines and increasing suppleness.

## HOW IS NATURAL ULTIMATE NOURISHING HYALURONIC MOISTURISER DIFFERENT?

The Natural Ultimate Nourishing Hyaluronic Moisturiser provides Smart Hydration. It is capable of holding up to 1000 times its own weight in water. Hyaluronic acid soaks in easily to instantaneously recharge moisture levels and restore skin's suppleness. Additionally, hyaluronic acid is a hydrophilic humectant that continuously draws water from the air. This ensures steady replenishment of hydration over the time.

In addition to the superior hydrating benefits of hyaluronic acid and squalane, the Natural Ultimate Nourishing Hyaluronic Moisturiser includes two lightweight oils, jojoba seed oil and apricot kernel oil. These oils quickly absorb to soften and plump the skin. These ingredients work in synergy to provide you with multiple layers of moisture that stay locked in for lasting hydration.

Each ingredient in the Savarnas Mantra Natural Ultimate Nourishing Hyaluronic Moisturiser is used in its most effective form and is specifically selected for its ability to get amazing results.

## HOW DOES THE MOISTURISER WORK?

Well-balanced formulations are essential for helping skin maintain optimum levels of hydration. The most effective moisturizers contain emulsion of ingredients that work synergistically to build levels of moisture from the inside out.

A humectant, like hyaluronic acid, is a water-based ingredient that draws moisture from its environment to the surface of the skin. By nature, their job is to increase the water content of the skin.

Emollients, such as squalane and jojoba seed oil, nourish and condition the skin and also provide extra moisture as they soften. Meanwhile, occlusives are ingredients that form a micro seal on skin's surface, ensuring that moisture stays locked in for lasting hydration. Some ingredients, such as apricot kernel oil, have both emollient and occlusive properties.

## OTHER INGREDIENTS

Besides the natural active ingredients, the Natural Ultimate Nourishing Hyaluronic Moisturiser also contains C13-14 Isoparaffin, Laureth-7, Phenoxyethanol, Ethylhexylglycerin.
