

Some of our products are approved by DIBT – the German Institute for Building Technology.

The DIBT certificate makes sure that the products are compliant with the legislation regarding the storage of hazardous liquids.

DIBT sump pallets are tested by an independent Institute.

DIBT sump pallets are produced with a production control according to DIBT requirements. The production control documents are kept during 5 years have to be shown to DIBT if required.

Advantages of DIBT – approved sump pallets:

UN Rating	DIBt	Non DIBt
Legislation	Compliant	Compliant?
Strength	Tested with 4 times load capacity	Official tests? Strength?
Reliability	Produced with DIBT approved raw material	Raw material?
Quality	Mechanical tests of the material (PE) produced	Material tests?
Confirmity	Control of dimensions and tightness	Production control?
Production	Has to be produced only in the factory mentioned in the DIBT certification	Factory?
Traceability	On each product: Label with production number, year of production, raw material, load capacity, Ü-Sign	Traceability?
