

Technical Data Sheet | EB8L

Multi Function PVC Containment Bund Liner | For EB8

Liners for use with multi-function PVC containment bund EB8.

The PVC liner is designed to prevent cross contamination and protect inside of bund from aggressive liquids. Minimises cleaning of bund after use.

Product Specifications

External Dimensions (WxL)	3000 x 13000mm
Unit Weight	Approx. 35kg
Material	PVC with a protective proofing layer (PES/PVC)
Material Weight	900 g/m ²

Product Features and Benefits

- Resistant to chemical and liquid exposure, ensuring long-lasting performance.
- Acts as a protective barrier to isolate different types of liquids during multiple uses.
- Precisely fits the EB8 containment bund to prevent leaks or gaps.
- Protects the bund interior from corrosive or harsh chemicals, maintaining its structural integrity.
- Prolongs the life of the containment bund by reducing exposure to damaging substances.
