BF8 Configuration - Long Layout

Important Information

Contents

2 x BF4 Sump Flooring
1 x BFS2 Joining Strip

1 x BFC Connector

Tools Required

Drill

27mm hole saw

Measuring tape (or ruler)

Drill Measurements

410mm from the inside edge

42mm up from the base

Please Note: Please ensure you follow the above drill measurements. If the recommended measurements are not followed, the grid(s) will not fit the base unit due to the grid towers.

Step 1
Lay out the two bases (ensure all grids have been removed)

Step 2
Use the measuring tape (or ruler) to mark the measurment for drilling

Step 3
Measure on the inside, from the left-hand side, 620mm from the inside edge, and 42mm up from the base. Once marked, begin drilling

MADE IN BRITAIN®

BF8 Configuration - Long Layout

Step 4
Once drilled, proceed to drill the same holes using the 27mm hole saw

Step 5
Repeat step 4 on the second base unit that will be connected

Step 6
Unscrew the nut from the BFC connector (left-handed thread)

Step 7
Remove the nut and the rubber washer form the connector

Step 8
Ensure the two holes and base units are lined up. Insert the connector through the two base units

Step 9
Screw on the rubber washer and nut

BF8 Configuration - Long Layout

Step 10a (Side 1)
Tighten the nuts until the bund walls are fi rmly together

Step 10b (Side 2)
The nut and rubber washer will create a seal. DO NOT OVERTIGHTEN

Step 11
Use the BFS2 Joining Strip. Push the strip down to hold the abutting bund walls together

Step 12
Insert all 4 grids

Step 13
The 2 sumps are now connected
