

## 200 pads with 160 litre capacity

Yellow chemical absorbent pads are your best solution when working with chemicals or when you are unsure what the spill/leaking liquid is. The bright yellow colour is a good visual warning to others clearly identifying the spill as hazardous. These pads are bonded and fitted with a cover-stock to provide excellent wear resistance and market leading tensile strength and are perforated to allow you to use as much or as little as you need depending on the application.

Absorbs acids - always use when you are unsure what the liquid is.
