

PRODUCT OVERVIEW

A low profile 2-drum sump floor with a removable grid is moulded from 100% recycled polyethylene that can be used as a stand-alone unit or combined with others to create unlimited bunded areas. Units can be joined together with plastic connectors to inter-link the sumps and the economic grid has a 1500kg static weight load.

Please note: Due to the composition of the recycled materials, we are unable to 100% guarantee the colour consistency of this product - this does not affect the structural integrity of the product.

Backed by our 3 year guarantee

-  100% polyethylene for chemical compatability
-  Removable plastic grid for easy clean-up
-  UV Stabilised
