 **WARNING:**
Do not look directly at the sun.

 **AVERTISSEMENT :**
Ne pas regarder directement le soleil.

 **ADVERTENCIA:**
No mires directamente al sol

10X40

WARNING!

Never look through your binoculars directly at the sun as this may cause blindness.

AVERTISSEMENT!

Ne regarde jamais le soleil avec les jumelles.
Tu pourrais t'aveugler!

ACHTUNG!

Schauen Sie niemals mit Ihrem Fernglas in die Sonne, da dies zu Blindheit führen kann.

¡ADVERTENCIA!

Nunca mires al sol con los prismáticos.
¡Podrías cegarte!

AVISO!

Nunca olhe para o sol com os binóculos, pois pode provocar cegueira.

ATTENZIONE!

Non guardare mai il sole col binocolo, potrebbe causare la cecità.

OSTRZEŻENIE!

Nigdy nie patrz przez lornetkę bezpośrednio na słońce - może to spowodować uszkodzenie wzroku lub nawet całkowitą jego utratę.

WAARSCHUWING!

Kijk nooit door uw verrekijker naar de zon, daar dit uw ogen ernstig zou kunnen beschadigen.

1. Soft rubber eyecups
2. Diopter setting
3. Center focus wheel

How to adjust the distance between your eyes:

The distance between your eyes is called interpupillary distance.

It varies from person to person. To achieve perfect alignment of the lenses to the eyes, follow these simple steps.

1. Hold your binoculars in the normal viewing position.
2. Grasp each barrel firmly. Move the barrels closer together or further apart until you see a single circular field. Always reset your binoculars to this position before using. Most binoculars have a graduated area at the top of the center hinge for reference in setting interpupillary distance for subsequent use.

How to adjust the diopter setting and center focus:

1. Adjust the diopter scale on the right eyepiece to 0. Look through the binoculars at an object about 150 feet away.
2. Shut your right eye, and focus correctly for your left eye using the center focus wheel (3).
3. Now shut your left eye, and adjust the focus for your right eye using the diopter setting (2).
4. Now the binoculars are correctly adjusted. You can vary the focus using the center focus wheel and both eyes will always remain in focus. Make note of the diopter setting on the right side for future use.

How to Clean:

1. Blow away any dust or debris on the lens (or use a soft lens brush).
2. To remove dirt or fingerprints, clean with a soft cotton cloth by rubbing in a circular motion. Use of a coarse cloth or unnecessary rubbing may scratch the lens surfaces and eventually cause permanent damage to the binoculars.
3. To thoroughly clean your binoculars, you may use a photographic lens cleaning fluid. Always apply the fluid to the cleaning cloth, never directly onto the lens.

Warning- The lens contains lead that may be harmful. Wash hands after touching.
