

Owners Instructions and Safety Manual

Front Child Carrier

THANK YOU FOR PURCHASING YOUR NEW EVERYDAY CARRIER.

This child carrier has been designed for your child's comfort, but requires a responsible adult for proper installation and use. Read this manual before installing your child carrier. If you have any questions about installation, or require replacement parts, please contact us at:

- 5 - Child and carrier removal
- 6 - Maintenance, care and storage
- 7 - Warranty parts list

WARNINGS

CYCLING WITH A CHILD IS A POTENTIALLY DANGEROUS ACTIVITY!

Fully understanding and following all of the warnings and instructions in this manual before using this carrier with your child is important! This manual contains important information about your carrier, and even more important information about your safety and the safety of your child while using this carrier. If you have any questions, please call us directly at 855-249-1471.

- Read all instructions before use! Failure to read, understand and follow these instructions may result in an otherwise avoidable accident. You or your passenger could be seriously injured or die.
- Do not operate a bicycle with a child carrier attached without first reading and understanding this manual. If you have any questions, contact Everyday Customer Service.
- Use this child carrier only with non-motorized bicycles capable of supporting the additional load of the child carrier, child, pack and contents. Do not use your child carrier on motorcycles, mopeds, automobiles or any other motor vehicle.
- Do not modify, replace any part, or alter this child carrier in any way. If you are not sure whether your bicycle is compatible with your child carrier or if you have questions or concerns about any parts or components, contact Everyday Customer Service.
- The safe and proper use of this product is your responsibility! In addition to obeying all traffic laws, and using proper hand signals, the rules listed below must be followed at all times.
- We recommend a frequent safety check of your bike. The bicycle to which the child carrier is attached must be in good working order, be able to accommodate the additional load, and be the proper size and adjustment for the rider.
- Do not use on any bicycle with rear suspension, bicycles that have a suspension seat post or with frames that are square, triangular or carbon fiber.
- Do not leave the child unattended in the child carrier.
- Both cyclist and child must wear approved bicycle helmets.
- Children must be old enough to wear a helmet and to sit upright without assistance. If your child is too small to properly wear the smallest size approved helmet, he/she should not ride in the carrier. Some provinces have mandatory helmet requirements and minimum age limits for children riding in bicycle carriers. Consult your pediatrician before carrying any child.

- Do not exceed the maximum seat load of 15 kg for child, pack and contents. The load of a front child carrier may lessen the stability and maneuverability and alter the riding characteristics of the bicycle, particularly regarding steering and braking. Check child's weight periodically to ensure they have not exceeded the weight capacity.
- Always fasten harness securely around child. Periodically check placement of harness, especially for a sleeping child. Do not allow any of the child's body, clothing, shoelaces or toys to come in contact with moving parts of the bicycle, as this can lead to entrapments and cause injury or death to both the rider and the child.
- Make sure there are no sharp objects the child can touch while in the child carrier. As this can lead to entrapments and cause injury or death to both the rider and the child.
- Instruct your child not to bounce, rock or lean. Sudden shifting of weight can lead to serious injury or death to you and your passenger.
- Using a child carrier on a bicycle may require changes in the way the rider mounts or dismounts the bicycle, as well as the range of movement for the handlebar. Care must be taken whenever the rider gets on or off the bicycle. It is recommended that a change to the handlebar is made if the reduced angle of steering to each side is less than 45 degrees.
- Cyclist must be an experienced, strong rider weighing 100 pounds or more.
- Do NOT use a kickstand or other parking device to support the bicycle with a child carrier attached. Attaching a carrier can change the balance of the bicycle making kickstands ineffective. The bicycle can fall over, damaging it and the child carrier.
- Do NOT transport bicycle on an automobile with the child carrier attached. The high wind force on the carrier may degrade or damage the carrier to the point that it will not perform reliably.
- Avoid riding at night. Your ability to see and to be seen is greatly reduced. If you must ride at night, use proper lighting and reflectors on your bike and wear reflective clothing.
- Never ride in inclement or hazardous conditions. Children should be properly clothed to be protected from the elements. Check the temperature of the child carrier before placing child in it to make sure the carrier is not too hot.
- Never install both a rear child carrier and a front child carrier on a single bicycle.
- Before each ride, ensure the mounted carrier does not interfere with braking, pedaling, or steering of the bicycle.
- Tighten fasteners securely and check them frequently.
- When no child is being carried, fasten the retention system buckles so the straps do not hang loosely and potentially become trapped in any moving parts of the bicycle.
- Always check any local laws specific to carrying of children in carriers attached to bicycles before riding.
- Do NOT use the child carrier if any part is broken.
- Do NOT mount the child carrier while the child is sitting in it.
- Make sure that the brake cables and gears do not get in the way of the mount.
- Do NOT attach mounting bracket to seat post. Attach mounting bracket around seat tube of bicycle only.

BIKE COMPATILITY - to properly fit this Child Carrier and ensure that you and your child are safe to ride, your bike should have a minimum 21" top tube length.

PARTS LISTS

1. Child carrier
2. Retention harness
3. Grab bar
4. Foot rests
5. Seat pad
6. Harness buckle
7. Support post
8. Mounting bracket
2 screws to use with 5mm
Allen wrench
9. Safety lock

GRAB BAR INSTALLATION

Insert the Grab Bar into the rectangular slot at the front of the Child Seat, using the bolts to guide it into place (image 01). Slide the Grab Bar Adjusting Plate into place by aligning the bolts into each slot (image 02). Attach a locking nut and washer to the end of each bolt, and completely tighten them.

WARNING: If bar is not secured into place properly, it could fall off during riding causing injury.

1. ATTACH MOUNTING BRACKET TO BIKE FRAME

The mounting bracket will be placed on the seat tube of the bike. Find a position to install the mounting bracket where there is no interference with cable guides or brake/derailleur cables (image 03). Use the provided plastic sleeves (3 sizes – (image 04) to create a snug fit between the mounting bracket and the seat tube of the bicycle. Insert the bolts into the Mounting Bracket, and tighten snugly (image 05).

WARNING: Do not place around brake/derailleur cable, housing or guide.

2. SUPPORT POST AND CHILD CARRIER ASSEMBLY

Insert the Support Post into the the guide holes beneath the Grab Bar on the front of the seat (image 06), and feed it all the way through until the rounded end is snug at the front of the seat. Position the Support Post Faceplate over the Support Post (image 07). Insert the bolts through the holes from the top of the seat, so that the end passes through the Support Post Faceplate (image 08). Attach a locking nut and washer to the end of each bolt, and completely tighten them (image 09). Attach the Seat Pad to the Child Seat.

3. CONNECT CHILD SEAT ASSEMBLY TO MOUNTING BRACKET

Connect the Child Seat and Support Post assembly into the Mounting Bracket by sliding the ends of the Support Post fully into the Mounting Bracket Guide Holes (image 10). Lock the posts in place by sliding the Safety Lock over the end of the Support Post, locking it in place ((image 11). The pin in the Safety Lock will insert into the end of the Support Post (image 12).

IMPORTANT! Double check all steps before departing!

5-POINT RETENTION HARNESS (image 13)

- Shoulder straps should fit snugly so that only one finger can fit between harness and shoulder.
- Ensure top of chest clip is positioned at armpit level.
- Ensure harness forms the shape of a V.
- Connect each buckle end and click to secure.
- To release, pinch each side of buckle and pull apart buckle ends.

WARNING - Child can fall out of child carrier if harness is not correctly fastened and adjusted.

Image 13

FOOT REST INSTALLATION AND ADJUSTMENT (image 14)

1. Loop the foot strap through the strap slot, and tighten to an appropriate tension where your child's foot will be securely held.
2. Periodically, check to ensure that the strap is correctly in place, and that your child's foot cannot move from the foot well.

Image 14

CHILD CARRIER ADJUSTMENT

The carrier will adjust slightly back and forth along the Support Post to allow more or less space from the handlebars. After making any adjustments, ensure that all the bolts and nuts are fully tightened before riding.

WARNING - Make sure that the child carrier and the child do not interfere with the handlebars, making it difficult to steer.

SEATING YOUR CHILD

WITH ONE PERSON HOLDING THE BICYCLE STEADY, THE SECOND PERSON PLACES THE CHILD IN THE CHILD CARRIER.

Adjust harness straps to properly secure the child and fasten buckles accordingly (image 15).

Image 15

10 POINT PRE-RIDE CHECKLIST

1. Is the mount properly installed on the bicycle frame?
2. Is the suspension rack installed properly into the mount?
3. Is the carrier mounted properly on suspension rack?
4. Is the harness properly fastened and adjusted?
5. Make sure when you turn handlebars with child in carrier, the handlebars do not pinch child. Adjust carrier clearance accordingly to allow for space.
6. Is the child a maximum of 15kg?
7. Are you using approved bicycle helmets for your child and yourself?
8. Is the child's clothing clear of all moving parts?
9. Have you done a bicycle safety check?
10. Have you double checked the child carrier to ensure all parts are tight and the rack is secure in the mount?

If you answered yes to all of these questions, you're ready to go! Enjoy, and have a safe ride!

CHILD REMOVAL

WITH ONE PERSON HOLDING THE BICYCLE, A SECOND PERSON MUST:

- Remove foot straps from child's feet.
- Unfasten the security harness buckle
- Free child from straps.
- Remove child from seat.

WARNING - TWO people are required to safely remove the child from child carrier.

SUPPORT POST AND CHILD CARRIER ASSEMBLY REMOVAL FROM MOUNTING BRACKET

1. To remove Support Rack and Child Carrier assembly from the Mounting Bracket, slide the Safety Lock to the open position.
2. Then lift the assembly out of the Mounting Bracket, which can remain on the bike when carrier is not in use.

MAINTENANCE, CARE AND STORAGE

CHILD CARRIER MAINTENANCE:

Your child carrier is designed for low maintenance and easy care. Periodically, inspect the carrier for damage, cracks, etc. Replace at first sign of damage by contacting Everyday Customer Service.

CHILD CARRIER BODY/SEAT PAD CARE:

Your child carrier can be easily cleaned with any mild soap or detergent and warm water. Do not use any abrasives, solvents, petroleum distillates or bleach. Wipe dry.

STORAGE:

When not in use, store your child carrier in a dry, ventilated area. Make sure seat is dry before storing. Keep your seat out of the sun when not in use.

BEFORE RIDING AFTER SHORT OR LONG TERM STORAGE, ALWAYS GO THROUGH THE PRE-RIDE CHECKLIST TO ENSURE THAT YOUR CARRIER AND YOUR BIKE ARE IN SAFE OPERATING CONDITION. CHECK ALL PARTS FOR A TIGHT, SECURE FIT.

Child Carrier Replacement Parts

Spare Parts: List

Number	Description	SKU
1	Shim (Set of three)	30500000
2	Mounting bracket - 2 screws to use with 5mm	30500001
3	Grab bar	30500002
4	Seat pad	30500003
5	Foot rests	30500004
6	Plate	30500005
7	Support Post	30500006
