

The new **CMI Footstrap** is here. Now there is no reason to spend a few hundred bucks on a new pair of boots when you can simply strap on this new footstrap and make any pair of shoes or boots able to be used with different climbing systems. The quick adjust buckle ensures the strap stays on and stays tight. The aluminum buckle is anodized bright green and is rated to 650 lbs. This strap works well with the HASS ascending system. Trimming of the strap may be necessary.
