

Cmi Mini Max Trolley

IMPORTANT SAFETY WARNING!

The Mini Max trolley is double-ended, meaning it can safely be run down the line in either direction. It is important to always back up the system in case of catastrophic failure using a large steel carabiner that must be clipped over the cable and hung on the back portion of the trolley (closest to the rider) as illustrated. It is imperative that a steel, not aluminum carabiner be used in order to prevent the carabiner wearing through due to carabiner to cable contact which could occur in the unlikely event of a total system failure. In order to prevent injury in the event of a total system failure, a backup tether must be clipped between the large steel carabiner and the rider. To assure proper trolley tracking, the backup tether should remain slack. *See illustration below.*

**The distributor/wholesaler/retailer is responsible for providing this warning to the customer, and this warning must accompany all sales of this CMI product.*

****The diagram below is the only approved rigging method for this product. CMI does not recommend any other method of use. Do not alter this product.***

***For use on 1/4"-1/2" cables**

***MBS 7,860 lbs/ 35 kN (Biner strength)**

***Weight 1.9 lbs/ 30.4 oz**

*** Max speed = 90 ft/sec or 60 MPH**

***Can be rebuilt by manufacturer**

Product Lifetime

It is a known fact that with repeated use, equipment will deteriorate. It is difficult to give an accurate lifetime of this product due to the environment in which it has been used. It is possible that wear damage could occur with the first use of this product rendering it useless for future usage. Any surface damage, excessive wear or impairment of the mechanical function of this product is easily observed. In addition to checks before and after each use, a detailed inspection should be performed by a competent person every 12 months. Do not hesitate to scrap a product that shows signs of excessive wear which might affect its strength. Any modification or alteration to this product is strictly forbidden.

Cleaning, Maintenance, & Storage

The Mini Max Trolley may be washed and rinsed in clean water. It should then be dried using a soft cloth. Do not allow it to come into contact with corrosive or aggressive materials, or stored at extreme temperatures. The wheels should be checked on a regular basis to ensure they turn smoothly and have not developed any unusual wear.

!FOR YOUR OWN SAFETY PLEASE READ!

- Activities such as but not limited to rock and ice climbing, caving, technical rescue, ziplining, etc are potentially hazardous by their very nature
- Any person using CMI equipment in any manner is personally responsible for learning the proper techniques through personal instruction by an instructor competent in all safety techniques and backup systems.
- CMI makes no claims as to suitability for any other purpose. There are no other warranties which extend beyond the face hereof. This product is sold "as is" without implied warranties of fitness or merchantability. This flyer is not a substitute for proper instruction! CMI cannot be responsible in any way for misuse of the equipment described herein.
- Always check the biner/sideplate wear points at frequent intervals to assure biner does not have significant wear from sideplates.
- *Always know the maintenance and use history of your equipment. The use of "second hand" equipment is strongly discouraged.
- *Failure to follow these warnings increases the risk of injury or death. You are responsible for your own actions and decisions.
- *Riders weight must be supported by a lanyard and supporting harness.

NEVER FORGET, YOUR LIFE MAY DEPEND UPON YOUR EQUIPMENT. INSPECT ALL EQUIPMENT BEFORE EVERY USE!
