## For your own safety please read:

Activities such as but not limited to rock and ice climbing, caving, and technical rescue are potentially hazardous by their very nature.

Any person using CMI equipment in any manner is personally responsible for learning the proper techniques through personal instruction by an instructor competent in all safety techniques and backup systems. This device is designed and sold as a tool for ascending vertical or near vertical ropes of 8.5mm to 16mm, and fixed ropes of 5mm to 8mm in diameter.

CMI makes no claims as to suitability for any other purpose. As with any ascending system, 3 points of contact should be maintained with the rope at all times to provide backup in the event an ascender comes off the rope.

There are no warranties which extend beyond the description on the face hereof. This product is sold "as is" without implied warranties of fitness or merchantability.

The purpose of this enclosure is to demonstrate how to attach CMI Expedition Ascenders to the rope. It is not a substitute for proper instruction!

CMI cannot be responsible in any way for misuse of the equipment described herein.

**Never forget! Your life may depend upon your equipment. Inspect all equipment before every use!**

### **CAUTION**

• Always know the maintenance and use history of your climbing and mountaineering equipment. The use of "second-hand" equipment is STRONGLY discouraged.

### **WARNING!**

Failure to follow these warnings increases the risk of injury or death. You are responsible for your own actions and decisions. This product is designed for climbing and mountaineering only. Climbing and mountaineering are inherently dangerous. Special knowledge and training are required to use this product.
