Smart devices are one of the hottest markets in the world of electronics, and one of the top companies that competes in the smart device category is [Microsoft](#).

**The Skinny:** Participating in Microsoft's [Designed for Surface](#) program, Accell has announced its [UltraAV DisplayPort 1.2 MST Hub](#).

**The Specs:** The UltraAV DisplayPort 1.2 MST Hub is a [Designed for Surface](#) licensed product that features multi-stream transport (MST) mode capabilities to enable independent monitor control and compatibility with high-resolution graphics.

The Fremont, Calif.-based cable manufacturer points out the product is designed to work with Microsoft's [Surface Pro 2](#) and [Surface Pro 3](#).

"Microsoft's [Surface](#) customers are looking for ways to easily expand their desktop. Accell has addressed this need with the release of a high-resolution [Mini DisplayPort 1.2 MST Hub](#)," notes [Michael Weizer](#), director of product and marketing, Accell. "We are excited to have our MST Hub join the [Designed for Surface](#) program."

Accell adds that the product is compatible with non-DisplayPort outputs, including VGA, DVI or MST Hubs are DP++ and are capable of converting DisplayPort signals to other display interface signals using passive or active adapters. The product supports resolutions up to 3,840 x 2,160 at 30Hz in MST mode, and users can view single images across two displays or dedicate monitors for specific applications.

**Solutions:** The UltraAV DisplayPort 1.2 Hub can be used in just about any [office environment](#) to support a variety of multimedia activities.
