

ACCELL

UltraAV[®] DisplayPort Multi-Monitor Adapter

- Works on Windows or Macintosh Computers
- HD Compatible, Supports Resolutions up to 3840x1024
- No Additional Software to Install, Just Plug-and-Play
- Full Display Performance With Virtually Zero Latency

Works With
a Notebook
or Desktop
Computer

It's Easy to Extend Your Desktop to up to 3 Displays

The UltraAV DisplayPort™ multi-monitor adapter allows you to enjoy multiple monitors from a single DisplayPort output. The adapter works with all DisplayPort enabled computers including notebooks, desktops or workstations. View one application across three monitors, perfect for gaming, graphics design or spreadsheet analysis. You can also choose to dedicate each monitor to a separate application, providing the efficiency and productivity of multi-tasking. The adapter delivers outstanding graphic quality and near zero latency, supporting 3 monitors and their resolutions up to 1280x1024 (3840x1024).

Easily Connect Up to 3 Monitors to Your PC or Notebook

The DisplayPort multi-monitor adapter is simple to setup and use. The adapter is external and there is no need to open up the computer. It's ideal for systems with integrated graphics or without an available expansion slots. There is no additional software or drivers to install. The adapter does not require an external power adapter and can be set-up in minutes.
