Powramid® Power Center and USB Charging Station.....WOW!

If you know anything about big jobs or losing power you soon learn that a lot of bigger things have bigger plugs, like 3 prongs which not many cords or power plugs have. Living here in FL we have hurricanes, which are not to much of a big deal because honestly it storms like that on a normal day so really a hurricane is a longer storm. Having hurricanes or rainy days power gets knocked off often, which makes for you to have to find things which you can plug in your fridge, freezer, power tools if you lost some of your roof :) , or had a ceiling leak.

I was sitting in my living room doing something on my computer when I heard what sounded like my kids left the faucet on, I had seriously just sat down after working all day to relax. I get up and head into the kitchen where the sound was coming from, I come around the corner and I see water pouring down my window, (no it was not raining outside) as soon as I was like Oh whatever splash! My ceiling came in!!!!!! Running around my house in a crazy nightmare trying to turn off the water my neighbor and friend saw me. After getting the water off I had about 3-4 inches of water in my kitchen!!!!!! So what does this have to do with the **Powramid Power Center & USB Charging Station**.....well thankfully this had just arrived, so with the help of my neighbor we were able to plug in our shop vacs to the Powramid Power Center & USB Charging Station. We had my floor and kitchen pretty much cleaned up by the time any men arrived.

I was so grateful for the Powramid Power Center and USB Charging Station because it was

strong and sturdy making it safe for me to plug in the shop vacs, if I hadn't had it I would have been running around looking for something which would give us room to put the 3 prongs into. Now its clean up time, so we have a huge mess, we have had to charge batteries for drills and other tools, again using the Powramid Power Center and USB Charging Station. I love this thing! It is something which I will take with me on vacation, we have been using it to power the cords, vacuums, phones, tablets to keep kids out of the way and so much more.

It is nice knowing that when I leave, my items are safe in the Powramid Power Center and USB Charging Station since it is also a surge protector. Living in FL you want all your devices on a surge protector or who knows what you will lose or will blow up and cause a fire. The Powramid Power Center and USB Charging Station is great for schools, offices, work place, homes etc anywhere you have a laptop, computer or anything you wanna save basically you wanna have a Powramid Power Center and USB Charging Station.

Key features of the Powramid Power Center are:

- 1080 Joules Of Surge Protection
- Two USB Charging Ports (2.1A)
- Six Adapter Friendly Outlets
- Heavy Duty 6 Foot Power Cord
- Power Stop Technology - automatically stops conducting power once the Powramid's absorption has reached capacity
- Fireproof X3 MOV Technology
- Green On/Off Switch for White Powramid
- Blue On/Off Switch for Black Powramid
- Safety Switch Cover
- 4 Rubber Feet that Protect Furniture from Scratching

You can purchase the Powramid Power Center and USB Charging Station [here](#) along with other amazing items like the [PowerSquid](#) another favorite of mine which keeps my tv, game system and phones safe during the day.
