

Accell Readies Launch of USB-C Adapters, Cables and Hubs

Accell begins rollout of USB-C products, with their entire USB-C product line to be on display at CES 2016

Fremont, Calif. – Oct. 14, 2015 – Accell, a provider of premium power products, computer and mobile device accessories, today announced the latest addition to the company’s ever-expanding product lines with its new USB-C adapters, cables and hubs. With an MSRP starting at \$17.99, Accell USB-C products are becoming available now.

Now shipping, Accell’s **USB-C to Gigabit Ethernet Adapter** easily converts a computer’s USB-C port into Gigabit Ethernet port. Adding a Gigabit Ethernet connection to a computer eliminates the slower connection speeds and reduces the security risks that are often present when using a wireless network. In addition, the **USB-C to HDMI 1.4 Adapter** converts a USB-C port into an HDMI output while the **USB-C to VGA Adapter** quickly converts a computer’s USB Type-C port into a VGA output.

Accell’s USB-C cables and adapters feature the following:

- *Smaller without sacrificing performance* – Roughly a third of the size of a USB-A connector, USB-C is capable of simultaneously sending data and power
- *Faster and stronger charging* – Many cables deliver up to 3A at 20V of power. USB-C can now power some larger devices including laptops
- *SuperSpeed+* - SuperSpeed+ USB 3.1 allows data transfer speeds of up to 10Gbps; 20 times faster than USB 2.0 (480Mbps)
- *Reversible plug* –The USB-C connection is reversible and works in either direction
- *Backwards compatible* – We have the right cable to keep all peripherals connected; USB-C can easily adapt to and work with non USB-C peripherals

Accell is readying over 20 different adapters, cables and docking stations including USB-C hubs supporting Power Delivery. For more information, please visit <http://www.accellcables.com>

About Accell

[Accell Corporation](http://www.accellcables.com) is focused on the design, manufacture and delivery of affordable, high quality accessories for the audio/video, mobile device and computer markets. Accell produces high quality and innovative products by combining the low cost benefits of a global manufacturer and the design capabilities of a Silicon Valley based engineering and marketing team. For more information, please visit our Web site at <http://www.accellcables.com> and find us on Facebook at @AccellCables.
