

BULK MATERIALS

PRODUCT NAME:

2A 3/4" Modified Stone

3/4" Modified Crushed Stone usually refers to stone that has a mixture of fines and stone dust in it. This type of stone is best used for a base when heavy compaction is needed. As a result, it is typically used for the base of concrete and paving projects, foundations of structures, walkways and driveway bases. Crushed stone often has an angular and jagged edge that occurs during the crushing process.

PRODUCT USES:

- Roads, Driveways, Building Foundations.
- Patios, Retaining Walls, Pool Decks.
- Good for Heavy Compaction on Hard-scapes and Masonry Projects.

COVERAGE: (Approx. for 1 Ton)

- 240 sqft @ 1" depth
- 120 sqft @ 2" depth
- 80 sqft @ 3" depth
- 40 sqft @ 4" depth

MATERIAL: Most commonly Argillite, Granite, Quartzite, and Limestone.
