

BULK MATERIALS

PRODUCT NAME:

3/8" River Rock

River Rock is a stone, varying in size from pea gravel to boulders. River rocks can serve many purposes from drainage to decoration in a landscape. River Rocks are popular in landscapes because they bring a naturalistic look to areas surrounding swimming pools, garden beds, trees, playgrounds, and water features. Smaller River Rock, sizes ranging from 3/8 inch to 2 inch, are suited for paths and walkways and their smooth texture makes them surprisingly pleasant to walk on.

PRODUCT USES:

- Flower Beds, Walkways, Driveways, Around a Swimming Pool, Under Down Spouts, Water Features, Etc.
