

**BULK MATERIALS**

## PRODUCT NAME:

Unscreened Topsoil

Our Unscreened Topsoil comes as it is, usually from excavations. Unscreened topsoil isn't broken down and may contain big particles such as roots, rocks, weeds, sticks, stones, wood chips, etc. This is why unscreened topsoil isn't really suitable for growing plants, yet, it can be a perfect base

soil is much cheaper than screened topsoil. However, since it contains many small and big parts of detritus, plants struggle to grow in it.

## PRODUCT USES:

- Filling Holes in Landscaping
- Raising Landscaping Beds
- Creating a Base for a Garden
- Installing fixtures

## COVERAGE: (Approx. for 1 Cubic Yard)

- 300 sqft @ 1" depth
- 150 sqft @ 2" depth
- 100 sqft @ 3" depth
- 50 sqft @ 4" depth

**BLEND:** Unscreened Topsoil contains roots, rocks, weeds, sticks, stones, wood chips, etc.
