

# LIFE CHOICE ADRENAL GLAND

## WHAT IS IT?

Glandular concentrates are derived from whole, desiccated adrenal glands of New Zealand range-grazed bovine. Desiccated glandular tissue increases the tone, function, and activity of our adrenal glands, which benefits the entire human system. Taking glandular concentrates can help support fat loss, promote muscle building, support digestion, and reduce stress and fatigue.

## WHAT ARE THE ADRENAL GLANDS?

The adrenal glands are small, triangular-shaped glands that are located on top of the kidneys. They produce hormones that regulate essential functions in the body, such as metabolism, the immune system, stress responses, and blood pressure. Chronic exposure to stress can reduce the function of the adrenal glands, resulting in low production of necessary hormones, such as cortisol. This can cause fatigue, body aches, high stress response, low blood pressure, and cravings for salty foods.

## WHAT DOES IT DO?

Life Choice Adrenal Gland supports healthy adrenal function by promoting the function of the adrenal glands and the production of stress hormones. This helps to balance the stress response, increase energy, lower blood pressure, balance metabolism, and regulate the immune system. The nutrients found in adrenal gland concentrates provide benefits to our human adrenal glands. Like organs heal like organs!

## WHO WOULD BENEFIT:

Those with:

- Radiation toxicity
- Adrenal fatigue
- Recurrent infections
- High blood pressure
- Dizziness
- Fatigue
- High stress

Adrenal Gland is best taken first thing in the morning on an empty stomach.
