

ORGANIKA COLLAGEN

WHAT IS IT?

Collagen is the most plentiful form of protein in your body, accounting for 30% of your body's protein. Collagen provides structure and strength to skin, muscles, bones, and tissues. As we age, collagen formation naturally declines, resulting in a loss of elasticity, strength, and tone throughout the body. Organika Collagen provides the peptides, the building blocks of collagen. Collagen has many benefits in the body, including healthy skin, joint and bone health, gut health, muscle growth and repair, and more.

WHAT DOES IT DO?

- Healthy hair, skin, and nails
- Maintains healthy cartilage in the joints and bones
- Promotes gut integrity
- Supports muscle growth and repair
- Provides structure to arteries

ENHANCED COLLAGEN ORIGINAL

Source: 100% Grass Fed Bovine
Collagen Type: 1 & 3

A single-ingredient formula, sourced from grass-fed, pasture-raised cattle. Free from hormones, antibiotics, GMOs and gluten. Flavourless and odorless.
