NextGen Respiratory Mask Protection

Teflon • High • Efficiency → “T•H•E Mask”

Comfortable sizes for adults and children!

Innovative Patented Nanotechnology Provides Excellent Protection, Superb Comfort, and Exceptional Breathability!

Exceptional Breathability

- Breathe easier without the airflow restrictions of other mask fabrics
- Patented microporous membranes allow greater airflow while maintaining the high level of filtration you rely upon for maximum protection

Extremely Thin & Lightweight

- Designed with a pleasant, contoured ergonomic fashionable appearance
- Ultra-thin and lightweight mask membrane with a thickness of just 0.23mm
- Provides a comfortable and secure soft face seal and adjustable nose piece which ensure compatibility with eye glasses / goggles and reduces fogging

Highly Efficient Filtration

- Physical filtration by 5 layers of nanofiber membranes which provide effective, durable protection (98.4% efficiency) against viruses, bacteria, mold, dirt, dust, and fine particles without electrostatic discharge problems

Reliable Protection

- Soft, hypoallergenic material with textured face seal forms a secure fit over nearly any face type while maintaining cool, lightweight comfort overall
- Equipped with non-toxic, odorless membranes which do not contain fluorescent agents and provide excellent wearer comfort and protection
- Sturdy, durable high-quality construction provides a fully reusable, long-lasting mask that can be used over and over again without deterioration

“T•H•E Mask” Our unique PTFE Teflon masks are individually packaged and available **NOW** in comfortable adult and children's sizes!

“T•H•E Mask” Adult version: light blue exterior; white interior

“T•H•E Mask” Children's version: white exterior; white interior

Teflon • High • Efficiency → “T•H•E Mask”

NexGen Respiratory Mask Protection

Provides Exceptional Comfort and Security for Adults, Teens, and Children

- Superior Comfort & Breathability
- Premium Washable Materials
- Non-toxic and Hypoallergenic
- Innovative Patented Nanotechnology
- Durable 5 Layer Assembly
- Ultra Lightweight Construction
- Superb Filtration & Protection
- Allows Clear Speech with No Muffling
- Soft Elastic Ear Loops
- Unique Ergonomic Design

Filtration Media Comparison

“T•H•E Mask”	N95 / KN95 Masks
Particle filtration: 0.075 microns	Particle filtration: 0.3 microns
Exceptional breathability; Able to speak easily & clearly	Difficult to breath; Unable to speak clearly; Muffling
Resistant to moisture, fluid droplets, vapor, humidity, oils, etc.	Filtration decreases substantially upon contact with moisture
Waterproof; reusable; can be disinfected repeatedly using alcohol mist	Not waterproof; non-reusable; and deteriorates with alcohol mist

“T•H•E Mask” PTFE membrane is a multi-layered porous Teflon membrane with an average pore size of 0.2µm with our patented membrane scoring 98.4% in certified Particle Filtration Efficiency (PFE) tests with Nelson Labs, USA.

Teflon • High • Efficiency → “T•H•E Mask”
 Suggested Mask Wearing Method for Optimum Comfort and Fit

Place the colored side of the mask facing outwards with smooth white side of the mask facing inward

Fold the middle section gently outward to fit the inward side and nose piece across nose bridge and place elastic loops over both ears

Carefully adjust the mask to cover both nose and mouth completely to provide optimum comfort and protection

“T•H•E Mask” PTFE Personal Pandemic Protection masks are individually packaged in sterile cellophane and available **NOW** in comfortable adult and children's sizes
