

Let your imagination SOAR!

One tool does it!

- TopAnchor® Quilting's templates rotate around patented stationary anchor post to give equally spaced star points
- Work completely at front of machine. Fastens on top of the quilt where your work is always at your fingertips and you are in complete control
- No need to reach under quilt for fastening. Nothing under the quilt to hinder stitching operation
- No additional templates or tools required
- Move tool around and fasten in different areas to put stars just where you want them
- Make second star upside down over top of first for a beautiful and easy 10-point star. Your friends will be jealous over how accurate it is!

- Lift guide off anchor post.
- Remove wafer.
- Remove stabilizing pin and anchor post from quilted square.

PentaStar LA

Longarm Quilting Template

Patented

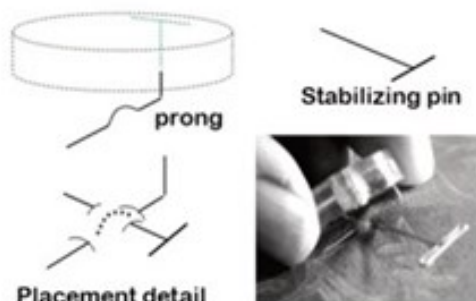

MADE IN USA

VIDEO DEMO

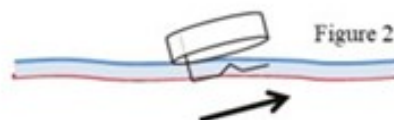

Directions for using anchor post and stabilizing pin

Hold anchor post with the prong pointing down to the fabric (Figure 1). Lower post, piercing fabric with prong (does not need to go through all layers).

Gently rotate rear edge of anchor post back a little further than level, then bring back up to level and pull slightly forward in a scooping motion to seat prong (Figure 2).

The prong will be seated in the fabric underneath the post with the point of prong visible on top of fabric.

Insert stabilizing pin into fabric under anchor post prong, and then back up to top of fabric (see photo above). Both ends of stabilizing pin will be on top of fabric.

Adjust so that ends of pins will be covered by the template and are away from hopping foot and needle. Slide wafer under anchor post and over prong and pin.

Instructions

USE WITH EXTENDED BASE OR TABLE ON YOUR LONGARM

Position the template over the anchor post and lay flat against the fabric. The tops of the template and the anchor post will be even.

Rotate the template gently from side to side to make sure it moves easily across the fabric surface without putting stress on the anchor post or fabric.

Stitch your star!

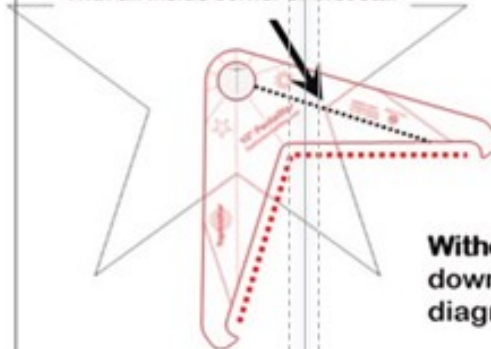

Bring bobbin thread to top of quilt anywhere on stitching line. Press down gently on template to hold in place and stitch in either direction to end. Stop with needle down. (Take one or two stitches in each point to anchor the thread.)

Rotate template until the other notch cradles the hopping foot again. Stitch from point to point, needle down and rotate. Repeat until star is completed.

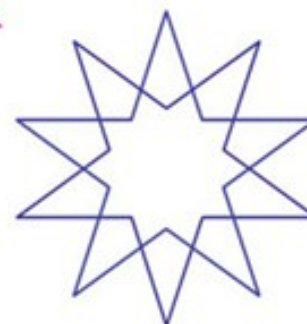

To remove template from quilt, lift template up and off anchor post; remove wafer and stabilizing pin, then tilt front edge of post down and move backwards and up until the prong is out of the fabric.

Align markings on template
With an inside corner of first star

**FAST!
EASY!
ACCURATE!**

Make a super easy 10 point star!

Without moving anchor post, make second star upside down over the first one. Line up template as shown in diagram.
