PRESS RELEASE

Levo Breaks the Industry Standard with New DESIGNER PRINT TABLET STANDS

Continuing their cutting edge tradition, Levo pushes the envelope in the Tablet Stand industry with innovative ideas in design.

LAKELAND FLORIDA, JANUARY 6, 2015:

LEVO continues to push the tablet stand industry by introducing a new line of designer prints on their world-class product.

Globally recognized for manufacturing the finest, hands-free stands for tablets, e-readers and books, the company has elevated the game with designer prints and custom looks for their line.

Where competitors offer Model T-like colors of “black or black”, LEVO has created everything from bold, black and white skulls to refined cherry wood veneer to appeal to a wider market. Other designs include flames, pastel floral, gunmetal or espresso.

Owner Dave Simon says, “We want to provide looks that express the individuality of our users. Our stands are items that get used for hours and hours everyday, so it makes sense that people want them to blend in with their décor or express something about themselves.”

The new designer stands are available worldwide by ordering online at www.LEVOstore.com and ship within days.

LEVO is a global leader in tablet and e-reader stands and is trusted around the world.
