# MEASUREMENT INSTUCTIONS 

## " It is always preferred that you are measured by a professional tailor or someone in the industry, but if you have to do it at home follow the instructions below and always call if you have questions"

| 1 | NECK | Measure from the base of the neck at the widest point and around the <br> neck, make sure there is room for one to two fingers. |
| :---: | :---: | :--- |
| 2 | SLEEVE | Measure from the nape of the neck to the shoulder first, hold the <br> measuring tape on the shoulder and measure down the arm to the top of <br> the wrist bone where you would wear your watch. |
| 3 | CHEST | Measure from the under the arms around the broadest part of the chest, <br> make sure that you take a deep breath in during this measurement as you <br> don't want the jacket too tight. |
| 4 | OVERARM | Measure around the arms over the chest, same as before make sure to <br> take a deep breath so we can gather the best measurement |
| 5 | INSLEEVE | Measure from the inside of the sleevee from the top of the arm pit to the <br> base of the wrist bone. If you already have a jacket that fits use the <br> insleeve measurement on a existing garmet to compare. |
| 6 | WAIST | Make sure that you start two inches below the belly button. Measure the <br> circumference of your waist all the way around and don't suck in. This <br> measurement is not your jean size so please record the actual <br> measurement not what jeans you wear. It will seem high compared to your <br> jean size but don't worry this is what the professionals need. |
| 7 | HIPS | Measure at this thickest part of your seat, make sure that your wallet and <br> keys are out of your pockets so we can get an accurate measurement. |
| 8 | THIGH | Measure your thigh all the way around at the top and make sure that it is <br> the thickest part of your thigh. |
| 9 | OUTSEAM | Measure from the outside of your hip two inches below your belly button, <br> and measure from that outside hip point all the way to your heel and inch <br> from the floor. |
| 10 | INSEAM | Measure from the inside of your thigh close to the ground to the inside of <br> your heel about an inch from the ground. |
| lat |  |  |
