

1. Prepare a U-disk and a USB-C cable or a U-disk with USB-C interface.

Format U-disk and set File System as FAT32.

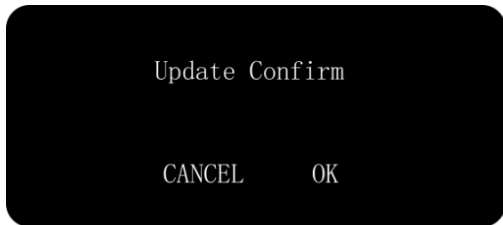

2. Open Firmware zip file and unzip the TX/RX file into the desktop.

3. Copy the zip file and description file in the TX/RX file into the U-disk root directory.

4. Insert U-disk into the TX, long press the left key to enter the upgrade mode and choose "OK" .

5. Wait until the system prompts that the upgrade is complete and reboot the TX. Check the version if it is 1.0.4.

6. Do the same for the RX upgrade.
