FD130/FD150 Full Device Protective Spill Cover Installation Instructions

CONGRATULATIONS!

You have made a great choice to protect your device from germs, spills and grime while extending the life of your terminal.

Instructions:

1. Clean the device so that it is free of dust and grime. Let dry.
2. Take off just the white mylar tape strip off of the bottom/front tape.
3. Flip up the front edge of the cover so that it is sticking straight up. This lets you align the keypad with the cover without the cover sticking to the device. Align the cover over the keypad. Flip down the front edge and adhere.
4. Take off the three remaining white strips.
5. Moving from the bottom of the terminal to the top, adhere the glue strips to the device. Adhere the top strip last.
6. Finish by smoothing down the bubbles, and adjusting the fit.

Tips for Care and Use:

- This cover is durable but it is made of plastic, so treat it gently.
- Do not use sharp objects or pens as they may puncture the cover.
- Clean with a damp cloth or antibacterial wipe.
- Do not remove the cover to clean it.
