Full Device Protective Spill Cover Installation Instructions

CONGRATULATIONS

**You have made a great choice to protect your device from germs, spills and grime
and extend the life of your Terminal/PIN Pad!**

-Gently lay the spill cover over the device making sure the top left corner of the cover hugs the device.

- VERY IMPORTANT STEP: Pull the left side of the spill cover down on the left side of the device so it is snug/flush with the side of the device.

-Remove the white Mylar adhesive strip on this left side, taking care not to remove adhesive from the cover.

THE DOUBLE SIDED TAPE WILL SOMETIMES STICK TO THE WHITE MYLAR. DON'T FRET. SIMPLY PLACE IT BACK ON THE DEVICE AND PEEL THE MYLAR OFF.

-Gently stretch the cover across the device from left to right so that the cover lines up with the keys while smoothing out the cover.

-Remove the white Mylar adhesive strips in this particular order to get the best adhesion: 1. Left side (as described above). 2. Top 3. Middle 4. Bottom 4. Right Side (2 strips)

-Finish by smoothing down the bubbles, and adjusting the fit.

And now your terminal is protected from spills, dirt and bacteria!

Tips for Care and Use

-This cover is durable but it is made of plastic, so treat it gently.

- Do not use sharp objects or pens as they may puncture the cover

-Clean with a damp cloth or antibacterial wipe. No need to remove the cover to clean it.

- The cover is not covered by a warranty:

It will protect and extend the life of your terminal but if repeatedly wiping the cover with an antibacterial wipe, you may need to replace the cover sooner so make sure you have enough covers in stock in case of breakage.
