### **ISC TOUCH 480 Protective Spill Cover Installation Instructions**

**CONGRATULATIONS! You have made a great choice to protect the life of your device!**

#### **Instructions:**

1. Clean the device and screen so that it is free of dust and grime.
2. If your device has a PINpad Shield installed, you will have to remove this Shield prior to the installation of the cover. The PINpad Shield is easily removed by pulling IN towards the keypad. You need to do this for both sides, then the Shield can be pulled out.
3. DO NOT REMOVE THE WHITE MYLAR STRIPS YET.
4. Place the cover on the device, making sure the keypad portion of the cover is lined up with the keys properly.
5. Remove only the FRONT White Strip (under the keypad) and adhere this to the device. DO NOT remove the the White Strips on the left and right yet.
6. THIS IS THE MOST DIFFICULT PART! It may take you a few tries to get it right. You want to get rid of any bubbles on the keypad section, and at the same time put the PINpad Shield back on the device, and snap the PINpad Shield back in to its holes on the right and left sides.  
  
The PINpad Shield WILL fit in, do not make any new holes in the cover to make it fit.
7. Adhere the other two front glue strips by removing the White Mylar.
8. Smooth out the cover. Remove the Right side Mylar and adhere.
9. Flip up the TOP LEFT CORNER of the cover so that it sticks straight up. Remove both of the remaining White Mylar Strips.
10. Moving from the bottom to the top, smooth out the cover and adhere the LEFT SIDE.
11. Flip down the corner, stretch the cover to smooth out the bubbles, and adhere the TOP SIDE.
12. Check and smooth down any bubbles. Smooth down the tape.
13. You can safely lift up the edges to stretch and reapply the cover.

#### **Tips for Care and Use:**

- This cover is durable but it is made of plastic, so treat it gently.
- Do not use sharp objects or pens as they may puncture the cover.
- Clean with a damp cloth or antibacterial wipe.
- Do not remove the cover to clean it.
