ORGANIZATION SOLUTIONS FOR 5S TOOLS TO COMMUNICATE A VISUAL WORKPLACE

We are committed to helping businesses promote efficiency and productivity while also eliminating waste. By implementing our top 5S lean solutions, you can achieve a more organized and safe work environment.

1 Tough-Mark™ Heavy-Duty Floor Marking Strips and Shapes

Tough-Mark[™] is an installer-friendly solution to traditional rolls of floor marking tapes and shapes. Our durable floor marking helps you create highly visible pathways for employees, forklift traffic, or material handling equipment. Tough-Mark[™] strips, shapes and printed messages withstand harsh warehouse environments, forklift abuse, and frequent cleaning.

2 Store-Boards[™]

Conveniently provide a place for everything and everything in its place. Easily organize tools, supplies, equipment, and materials used every day – for all to see. By providing a visual workplace, you are on the path to organization, increased productivity, and safety.

3 Custom Boards

Create a custom 5S shadow board with unique tool shadows, colors, and logos all sized to meet your specific needs. Custom hardware is available along with materials that meet the demands of any work setting from food contact to durability.

4 Red Tags and Signs

Maintain excellent work quality and precision by tagging out items that are defective, cannot be identified, or objects that need removal from an area. Then take it a step further by placing a Red Tag Center to house the items whose immediate use or need is unclear.

5 Floor Signs

Improve visual communication with floor signs that are not only durable but also contain a protective overlaminate with a non-slip pebbletexture. By implementing floor signage in your facility, you can achieve sorting all necessary items into an appropriate place, provide safety to employees by identifying traffic flow and work areas, and creating an efficient workplace.

6 Magnets and Holders

Multi-Colored Ultra-Cling[™] Document Holders with a magnetic backing make placement and movability easy on KPI, Site-Boards[™], and message boards. Add components to your boards like Indicator Magnets to track production, inventory, and any unique demands your application has.

7 Store-Drawer[™] Foam Tool Organizer Create Your Own

Create efficient storage and eliminate foreign object damage with a foam tool organizer kit. This easy-to-use system allows you to eliminate wasted time looking for tools, rummaging through drawers, and sorting through loose equipment.

Motivate your team and showcase your commitment to workplace organization with a 5S banner printed on durable, reinforced, flexible poly sheeting. When employees are driven to improve their workplace with 5S, then safety, productivity, and efficiency increase.
