

IceSlip 63

IceSlip-63 is a non-stick clear coating infused with fluoropolymers and silicone. IceSlip reduces snow and ice buildup, frozen doors and clogging of augers and chutes. This is recommended for snow blowers, door gaskets, snow shovels, snow mobiles, snow plows and gutters. This snow and ice repellent coating also prevents snow from building up on satellite dishes. IceSlip is used by brushing or wiping onto the surface when clean (before rain, ice and snowfall). This formula is fortified with fluoropolymers to enhance snow, ice and rain repellency.

- Non-stick clear coating
- Formulated with fluoropolymers and silicone for optimal non-stick performance
- Prevents snow and ice buildup, frozen doors and clogged augers and chutes
- Good on snow blowers, door gaskets and snow shovels
- Good on snow mobiles, snow plows, and gutters and leaders

Color	Colorless film
Tints	None
Solids percent primer	~10%
Flammable solvents	Yes
Storage temperature	20-30°C
Shelf life	1 year
Weatherability	1 - 2 years (based on environmental conditions and abrasion)
Taber abrasion	Hydrophobic after 50 cycles with CS10 wheel

Application Instructions

All surfaces need to be dry and free from dirt, wax and grease for good adhesion. The temperature of the surface should be between 35°F and 95°F. Keep container at room temperature prior to use.

First shake the container vigorously for 30 seconds. IceSlip is used by simply brushing or wiping onto the surface before rain, ice and snowfall. The coating is transparent and takes 2 hours to cure.
