HOTEL COLLECTION

Hourglass Diffuser

Decorate with subtle scent and experience the essence of a 5-star hotel with every turn of the hourglass.

Instructions:

1. Fill the detached glass bottle with the included Hotel Collection Fragrance Oil.
2. Assemble, making sure the bottle containing the fragrance oil is at the bottom of the metal diffuser body. Screw tightly.
3. Swiftly turn the hourglass over to begin the diffusion cycle and do not turn again until all of the fragrance oil has diffused completely from the top to the bottom. When flipping, be sure to grab one of the glass ends; do not hold it from the center.

Tips:

- Place the hourglass on stain-resistant surfaces, such as quartz, granite and non-porous solid surfaces.
- To activate the scent, flip the hourglass twice a day so that the reeds inside can be saturated with fragrance oil; it may take 3 days to experience the full effect.
- The hourglass releases a subtle aroma, meant to complement other scenting accessories, such as the Scent Diffuser, candles and room sprays.
- For the best results, use in small spaces up to 200 square feet, like bathrooms and bedrooms.
- In the case that some oil leaks out, simply wipe down the hourglass.
- We do not recommend switching fragrance oils after diffusing, as the reeds inside have already absorbed the initial scent.

To avoid leakage:

- Flip the hourglass quickly, being sure to grab it from the glass ends; do not grab it from the metal body.
- Do not flip until the fragrance oil has completely diffused from the top to the bottom.
- Do not tilt it or lay it on its side.
