

Why is Wind Energy Good

Environmental Benefits

- Emits no greenhouse gases.
- Creates no physical waste.
- It's a clean renewable energy source.
- Small spatial footprint.
- Does not use or waste water.

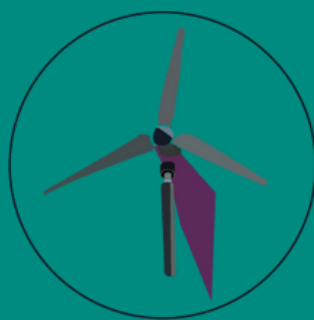

Financial Benefits

- Wind is free.
- Wind energy is unaffected by inflation.
- Unlimited supply of wind.
- Low operation costs.
- Low maintenance costs.
- Can coexist with other clean energy sources.

Canadian Wind

- Canada is blessed with very good wind.
- Vast potential for wind energy.
- 9th worldwide for wind energy capacity.
- Wind energy grew the most over the past decade.
- Anorra™ wind turbine's operates reliably in all Canadian weather.
- Wind occurs 70% of the day in Canada.

What Wind Energy Can Do For You

- Can cut your Co2 and methane emissions significantly.
- Provides affordable and clean renewable energy.
- Will assist in living towards a net-zero lifestyle.
- Offers efficient and reliable renewable energy.
- Will reduce the total cost of energy in rural Canada.
