

# **ECTO** GON<sup>®</sup> POULTRY

## Ecologically Effective Bird Health

Ectogon<sup>®</sup> Poultry is a unique and efficacious feed supplement formulated to keep birds free from external challenges in a natural and safe way. Easily fed through the drinking water, Ectogon<sup>®</sup> Poultry works effortlessly through the birds system to ecologically increase comfort resulting in improved productivity and well-being, without the need for chemicals.

### Enhance Bird Productivity

To help maximise economic output

### Limits Adverse Pecking

Reduce unnecessary loss

### Increase Bird Comfort

Improve production quality

### Ameliorates Egg Variability

Supporting overall egg quality

### Reduces Chemical Use

All-natural option, keep birds in situ

### Impedes Exogenic Challenges

Consistent Effective Results

Contains patented PST22 Polysulphide Technology®

Maximises the biological potency of each individual polysulphide chain for optimal effectiveness

Helps reduce potential problems caused by mites. Disrupting their behaviour so they become less active

Unique, all-natural option

No withdrawal period, no risk of build-up or resistance

A sustainable alternative to chemical or antibiotics use

Fed through the water systems

24 hour availability to the hens for maximum cover

Fast acting results can protect the hens at night when mites peak feed

Palatable formulation

Increased water consumption can help increase appetite and feed

Helping to increase production output to maximise profitability

Sugar-free low pH formulation

Will not cause biofilm build up in the water lines and drinking nipples

Reduce the need to clean lines

Zinc & Methionine

Skin promoting properties

Helps support overall stock health and appearance reducing unnecessary stress

#### Suitable for:

Laying Hens

#### Feedrate:

1 litre/16,000 hens/day or 0.04% - 400ml/1000 litres of water

#### Size:

1kg bottle or 5 litre can

#### Programme:

Hot Weather:

- 21 day build up
- 7 days off
- 7 days on

Cooler Weather:

- 21 days build up
- 14 days off
- 7 days on

#### Benefits of feeding a liquid:

- Easy to administer with low labour costs
- Fast acting within the metabolism of poultry
- Guaranteed intake levels
- Minimises stress through avoidance of handling
