21 Auto-courses to find your ideal massage

“21 Auto-courses to find your ideal massage” meet your massage therapy needs with expertly crafted master courses using 81 unique massage techniques.

Fully enjoy the highest levels of comfort and indulge in 4 types of 30 min. deluxe long course and 17 types of 16 min. body part and focused selective courses.

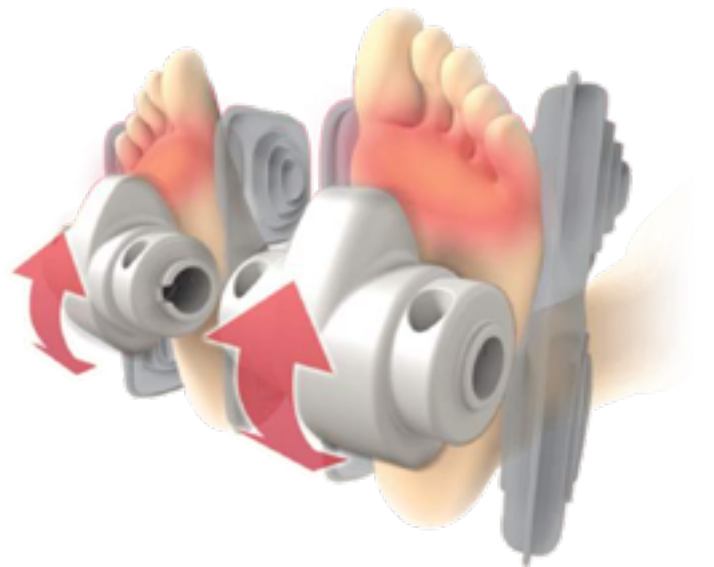

These 12 courses are equipped with 6 types of targeted body part massage, 3 types of deep core kneading techniques, and 3 types of body part stretch.

SHIATSU Reflexology

“SHIATSU Reflexology” massage functions with a combination of compression and shiatsu reflexology rollers designed to target the plantar fascia muscles in the arch of the foot.

These are specially designed rollers that fit the arches of the feet for a penetrating massage. Utilizing SHIATSU massage movements while holding the foot securely with the air compression system located near the ankles and insteps simultaneously. It also promotes improved blood circulations when coupled with the integrated foot heaters.

These 12 courses are equipped with 6 types of targeted body part massage, 3 types of deep core kneading techniques, and 3 types of body part stretch.

World most advanced

4D deep tissue

BUY NOW

“World most advanced 4D deep tissue massage robot” and “The Worlds most advanced dual layer body scan system” The industry leading 3D depth system (approximately 5 in) targets the deeper layers of muscles located in the back, neck and lumbar. The dual sensors optimize the length and depth of the massage to ensure optimal performance.

**Nearly 5inchs of 3D back
massage strength
adjustment.**

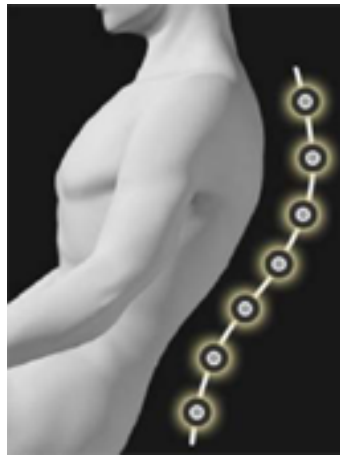

5inchs of 3D allows users to dial up, or down, the pressure on their back.

5 inches

of 3D allows users to dial up, or down, the pressure on their back.

Back

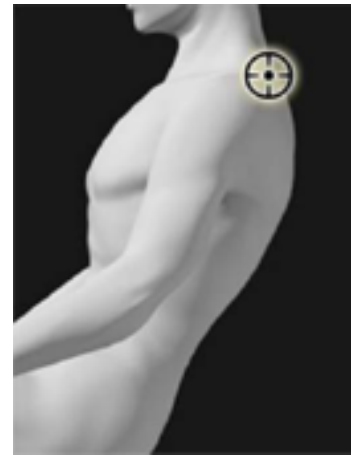

Auto detect the spinal line

Optimize the "depth" of the massage

Shoulder

Auto detect the shoulder position

Optimize the "points" of the massage

Power stretch

BUY NOW

A new way to rest and relax massage.
Multiple new stretches that increase massage effectiveness by targeting hard to massage muscles groups.

“Triple-mode enhanced air compression system” stimulates blood flow and supports vascular health by compressing and pulling on fluid retention areas in the body.

The enhanced “variable compression system” allows the user to easily control the rate of compression in the desired region. This allows you to chose from 3 different types of compression massage modes “Hand kneading mode”, “Pulse mode” and “Normal mode”

Near 180 degree flat recline

“Near 180 degree flat recline” is a high-quality sleeping position allowing the user to stretch out nearly flat opening all the tissues of the back to massage optimizing the feeling of comfort and massage.

An almost flat sleeping position is achieved due to the unique frame structure. Now during a longer massage you can relax and allow your body tissues to open freely allowing the massage robot to more effectively massage the affected area.

Dual heaters

“Dual heaters” warm up around erector spinae muscles and soles of the feet.

The dual heater work to stimulate blood flow and bring blood to the surface of the skin where the massage rollers can stimulate the tissue to enhance circulation. These heater also loosen stiff muscle enabling a more effective massage.

* Heaters can also be used independently
