

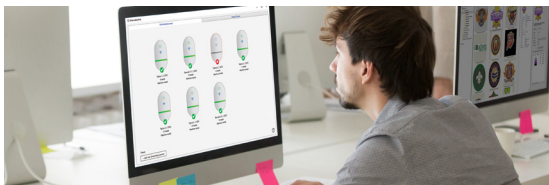

Graphic Designers
can now create embroidery designs
using the industry-preferred #1 choice

Created for graphic artists. Taking embroidery industry best practices and combining them together with Wilcom's world-class creative tools, you will learn how to turn your existing designs (vector and raster) into professional embroidery designs.

By applying over 40 years of Wilcom's expertise, the software makes the more complex technical decisions and helps guide those with little digitizing experience to create high-quality embroidery designs. EmbroideryStudio e4.5 Decorating will teach you how best to transform print and web media designs into embroidery designs destined for fabrics. The introduction of the EmbroideryConnect WiFi Device, a contactless embroidery solution, can dramatically improve your embroidery and multi-decoration business. Call now and experience the difference it can make to your business.

Today's software is a lot more affordable than you imagine

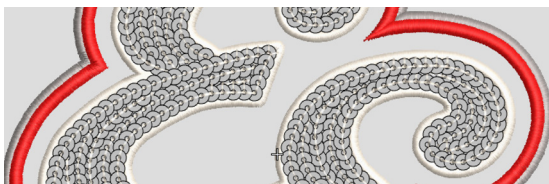

EmbroideryHub

A management console to setup and manage your EmbroideryConnect devices. EmbroideryHub is standard and free in all e4.5 software.

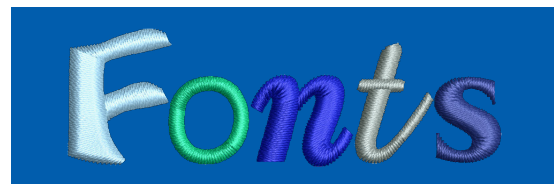

CorelDRAW® GraphicSuite 2020
