

MARSH:ENCO

Package sewage treatment plants

High-performance and extremely competitive sewage treatment plants from the UK market leader for today's cash-conscious market

All Marsh:ENCO systems can be supplied as gravity or pumped outlet. Variable inlets and risers can be provided.

For more information, please contact Marsh Industries.

- Tested and approved to the most stringent European Standards: EN12566-3: 2005+A1:2009
- Small footprint for easy installation - provides enhanced health and safety benefits
- Heavy duty shell as standard enables installation in all ground conditions. Unique 'keying-in' lips assists anchoring into granular or concrete surrounds
- Near silent, energy efficient compressors (located externally) with integral alarm (approximate annual running costs of £35 p/annum)
- High specification bio-media (310m³ per m²) and membrane diffuser ensures even circulation and maximum treatment efficiency
- Sludge return pipe improves system circulation
- Variable inverts for ease of installation at various depths – 250, 500 and 750mm risers available
- Pumped outlets available

Model (Pop)	Length +/-50mm	Width +/-50mm	Height +/-50mm	Inlet		Outlet
