# Polypropylene Laminar Airflow Fume Hood

TopAir's Laminar Airflow Fume Hoods offer clean bench functionality. They are made of high-quality non-corrosive polypropylene with excellent chemical resistance. Polypropylene increases the product's tensile strength and improves its thermal characteristics.

The fume hoods protect laboratory staff from noxious fumes released by acids, dangerous gas and organic solutions - materials and acids which regular steel hoods may not withstand.

Harmful and unpleasant chemical fumes are removed from the controlled environment to facilitate a safe and pleasant work environment. The fume hood channels chemical vapors out of the building using an external fan installed on the roof or on an external wall, and then channels the filtered air back into the workspace.

The hoods are designed for work with heavy chemicals, have been independently tested, they **comply with EN-14175, ASHRAE 110-1995; and are CE certified**

NEW!

- Clean bench functionality
- Polypropylene structure with high chemical resistance
- One-piece welded structure
- Built-in polypropylene worktop
- Tempered glass sliding front sash
- Cleanliness level - Class 100/ISO 5
- Eco-friendly, cost-effective 800 LUX LED lighting separated from the work area
- Includes polypropylene lower base cabinet
- Optional: sink/water tap/gas tap/vacuum tap/electric sockets
- 7" color touch screen controlling lighting and power. Optional VAV system.
- **Complies with EN-14175, ASHRAE 110-1995; CE certified**
