Formulation: Oil soluble Oleoresin Capsaicin combined with an ultraviolet marking dye. **The formulation is non-flammable and electronic immobilization device compatible.** Each canister is stabilized and contains an operating pressure of 100 PSI. The pharmaceutical grade propellant is non-ozone depleting, providing greater dependability and a much-improved shelf life.

Labeling: All canisters are labeled with a protective Mylar over lamination cover which resists wear and water damage. Canisters are labeled with the shot pattern, batch number, serial number and expiration date. Individually serialized canisters permit easy identification and link to formulation batch numbers for quality assurance tracking.

Quality Control: Manufacturer maintains quality control system in accordance with the American National Standards Institute (ANSI) for the following:

Operation Test	Discharge Duration Test	Intermittent Discharge Test	High Temperature Exposure Test
Temperature Cycle Test	Operating Weight Test	Gasket Dependability Test	Hydrostatic Pressure Test
One Year Time Leakage Test	Pressure Vessel Test		

Federal Regulations: The manufacturer certifies that all units comply with the following:
