

PRECISION HAND SANITIZER

SPECIFICATIONS:

- Unscented Gel
- 73% Ethyl Alcohol
- Color: Clear
- Contains glycerin for extra moisture
- Kills harmful bacteria and germs

About Ethyl alcohol used to manufacture Precision Chemical Technologies' Hand sanitizers:

The Ethyl Alcohol used to formulate Precision Chemical Technologies' hand sanitizers conform to the USP (United States Pharmacopeia) standard. The denaturants used in the ethyl alcohol are also a requirement by Health Canada for alcohol-based hand sanitizers to reduce the risk of accidental or deliberate ingestion. The Certificate of Analysis provides details on the impurity profile and indicates the quality of the ethyl alcohol used in the hand sanitizers.
